Activity: CDBG-DR funds will be used for a two-phased project to reduce flood risk to Silver Lake Park and surrounding areas. The first phase will include an assessment of drainage and stormwater capacity in Silver Lake and other stormwater basins in Silver Lake Park. The assessment will inform the preliminary design of drainage improvements, stormwater management infrastructure, and additional public assets for the park. The second phase will include the full design and construction of the improvements proposed and prioritized in Phase I.

Objective: To address the urgent need to provide drainage infrastructure improvements to address flooding in Silver Lake Park and surrounding neighborhoods.

Location: The target area is Silver Lake Park and surrounding neighborhoods. Silver Lake Park is located in Baldwin, which is a hamlet of the Town of Hempstead. Silver Lake Park runs along the properties along Lakeside Drive to the north and extends to Foxhurst Road to the east and south. Its westernmost edge abuts the properties along Parkview Place south of Merrick Road.

Amount: Table 1 shows the CDBG-DR activity and the corresponding dollar amount for Phases I and II of the Silver Lake Park Drainage Improvements project along with an estimate of the total project cost.
