

Passive Parks

- * The Villages/Communities are listed alphabetically. The distinguishing feature of passive parks, in contrast to active parks, is that they do not provide recreational facilities.
- ** If there is more than one passive park in a single Village/Community, the facilities are listed alphabetically. The parks in this directory enforce different policies regarding public access to the facilities. Whereas some parks are accessible to the general public, several parks have restricted access, and others are open to district residents only. For information regarding access to a particular park, contact the facility if there is a phone number listed in directory. If no phone number is listed, contact the corresponding Village if the park is located in an incorporated Village ([Village Contact Information](#)), contact the corresponding City if the park is located in an incorporated City ([City Contact Information](#)), or contact the corresponding Town if the park is located in an unincorporated Community ([Town Contact Information](#)).
- *** Passive parks cannot be contacted by phone, so the location of each facility is listed in the directory if available.

Passive Parks		
Village/Community*	Facility**	Location***
