

Nassau County, NY

County Legislative Districting

An analysis presented to the Nassau County Temporary Districting Advisory Commission
November 10, 2022

Dr. Megan A. Gall
Blockwell Consulting, LLC

Credentials

- PhD in Political Science (American Politics)
- MS in Geographic Information Science (GIS)
- Certified GIS Professional from the GIS Certification Institute
- Research Associate Appointment with University of California, Berkeley
- Voting Rights Act work since 2014
- Opened Blockwell Consulting, LLC in 2021
- Clients include Strumwasser & Woocher, LLP for the CA Citizen's Redistricting Commission, the U.S. Dept. of Justice, national non-profit law firms, private law firms, state-level Secretaries of State, and numerous local jurisdictions including cities, counties, and special jurisdictions of all sizes

Instructions

- Perform a non-partisan analysis in all respects
- Analyze the degree, if any, of racially polarized voting (RPV) in Nassau County
- Confirm compliant alternative districting configurations are possible and if so, draw a compliant plan based on the law and districting criteria
- Analyze any proposed districting plans for compliance with federal and state law
- Provide a complete written report with my findings and conclusions

Summary of Findings

- Nassau County elections show patterns of racially polarized voting
 - Black and Latino voters generally vote cohesively in support of the same candidates
 - White voters generally vote as a bloc in a such a way that usually defeats the minority-preferred candidate
- It is possible to draw a map that complies with all federal and state legal requirements and also contains 5 majority/minority districts in which the combined Black and Latino voting age population (VAP) and citizen voting age population (CVAP) are both above 50%.
 - Similar to countywide demographics - ~24% Black and Latino CVAP countywide and 5 of 19 m/m districts is ~26%
- Without these majority/minority districts, Black and Latino voters will usually be unable to election candidates of their choice.

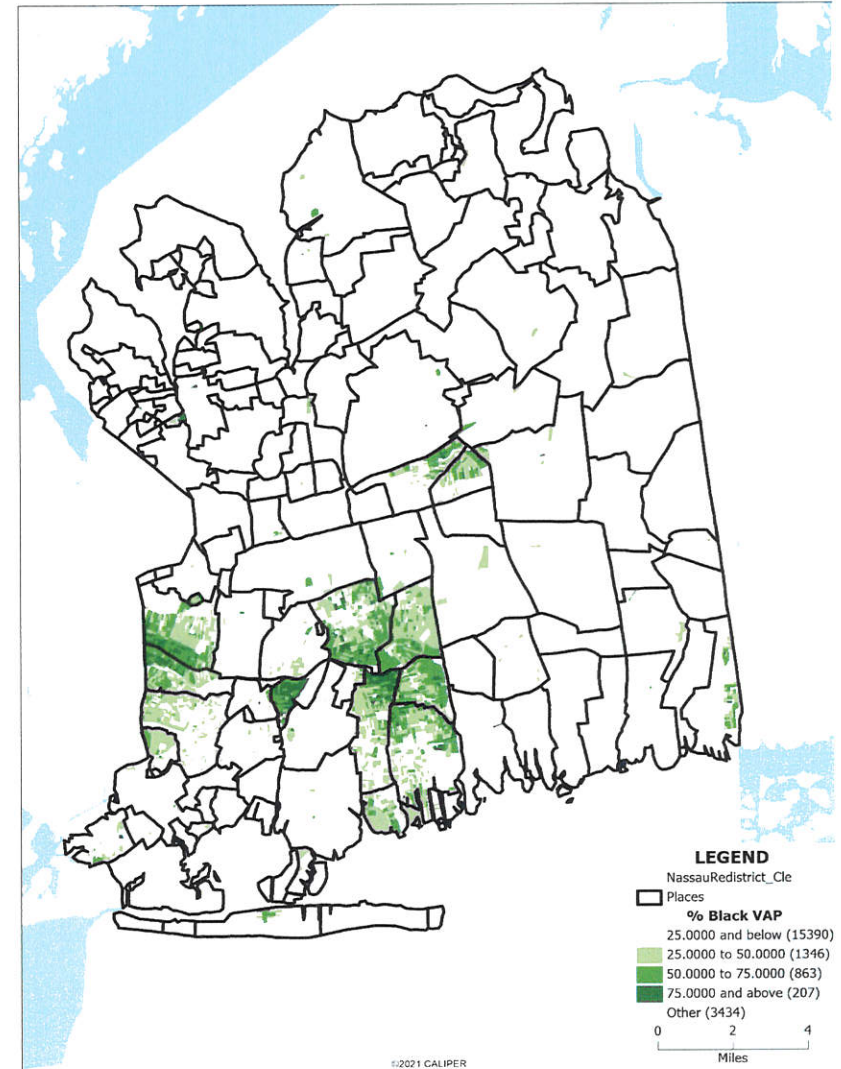

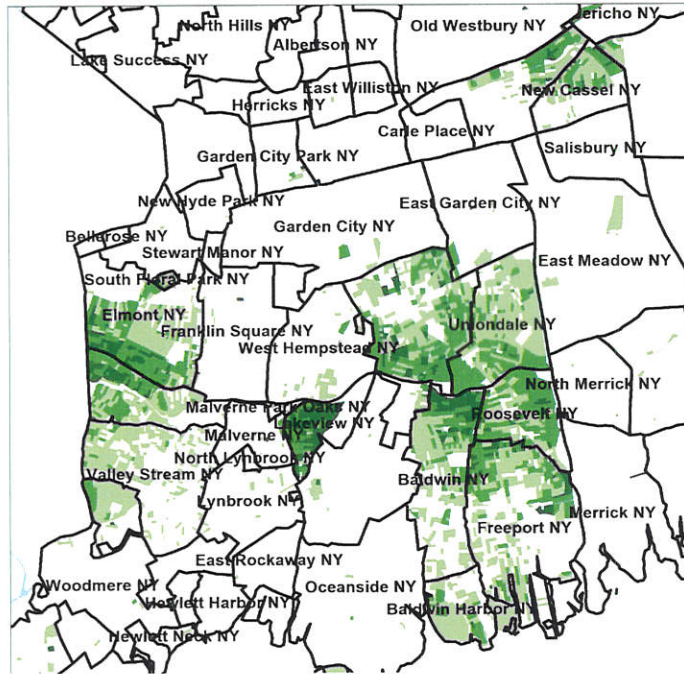

Demographics of Nassau County

- Overall population growth
- Significant decline White population
- Significant growth in Asian population
- Significant growth in the Black and Hispanic population

Demographics

Asian Voting Age Population

Racially Polarized Voting

- RPV exists when racial/ethnic groups vote as distinct groups with district candidate preferences
- We use a statistic called Ecological Inference (among others) to measure the degree of racially polarized voting
 - The predominant measure of RPV
 - Results reflect estimates of group voting behavior
- Measuring RPV is part of the analysis of the Gingles Preconditions, which is a piece of the legal framework for assessing Voting Rights Act violations established in *Thornburg v. Gingles (1986)*
 - Is voting racially polarized? If so, who are the candidates of choice?
 - Are the minority voters' candidates of choice usually defeated?
- Performance Analyses - analyze past elections to see if the new district boundaries perform for the minority-preferred candidate

RPV in Nassau County

- Analyzed the 2017 and 2021 County Clerk contests, considered the most probative elections for analysis
 - Recent elections
 - Endogenous elections
 - Minority candidates on the ballot
- 2021 contest between Brown and O'Connell - RPV Present
 - The candidate of choice for Latino and Black voters was Brown with ~84% to 95% support
 - Black and Latino voters voting as a coalition
 - The candidate of choice for White voters was O'Connell with 66% - 70% support
 - The White voting block was sufficient to defeat the minority's preferred candidate
- 2017 contest between Bennett and O'Connell - RPV Present
 - The candidate of choice for Latino and Black voters was Bennett with ~88% to 96% support
 - Black and Latino voters voting as a coalition
 - The candidate of choice for White voters was O'Connell with ~59% to 62% support
 - The White voting block was sufficient to defeat the minority's preferred candidate

Redistricting Criteria

- **Equal population**
 - Federal requirements - rooted in US Constitution, 'one person, one vote'
 - Local requirements - Municipal Home Rule Law
 - Prison-adjusted total population from the 2020 Decennial Census published by the New York State Legislative Task Force on Demographic Research and Apportionment
- **Geographic compactness: as compact as possible while otherwise complying**
- **Contiguous: Avoid connecting districts by water**
- **Preserve political subdivisions**
 - Traditional redistricting principle
 - Local requirements - Municipal Home Rule Law
- **Preserve Communities of Interest**
 - Desirable
 - Incorporate communities of interest as relayed to me and largely based on public testimony
- **The Voting Rights Act and majority/minority districts**
 - 5 districts based on overall minority population, residential patterns, RPV, and in full compliance of all other requirements
 - The districts perform and allow minority voters the opportunity to elect candidates of their choice

Factors Not Considered

- Election results, partisan affiliation, party advantage, or any other partisan measure
- Boundaries or cores of the 2013 Legislation plan
- Addresses of incumbent county legislators

Quick Orientation to the Proposed Plan

- District boundaries are black lines
- District numbers are labeled
- Smaller subdivisions shown with a dotted line

Proposed Plan: Equal Population

New York Municipal Home Rule Law:

"the difference in population between the most and the least populous district shall not exceed five percent of the mean population of all districts."

Populations based on the prison adjusted dataset.

Ideal Population

- $1,396,922$ (total population) / 19 (districts) = $73,522$

Overall Plan Statistics	
Total	1,396,922
Ideal Population	73,522
Population Range	72,006 to 75,231
Absolute Range	-1,516 to 1,709
Absolute Overall Range	3,225
Relative Range	-2.06% to 2.32%
Relative Overall Range:	4.39%

District	Population	Deviation	% Deviation
1	72,619	-903	-1.23%
2	74,617	1,095	1.49%
3	74,012	490	0.67%
4	72,644	-878	-1.19%
5	72,006	-1,516	-2.06%
6	73,970	448	0.61%
7	72,556	-966	-1.31%
8	73,788	266	0.36%
9	74,547	1,025	1.39%
10	72,980	-542	-0.74%
11	72,219	-1,303	-1.77%
12	72,089	-1,433	-1.95%
13	75,231	1,709	2.32%
14	75,200	1,678	2.28%
15	72,130	-1,392	-1.89%
16	73,860	338	0.46%
17	72,265	-1,257	-1.71%
18	75,045	1,523	2.07%
19	75,144	1,622	2.21%

Proposed Plan: Compactness

- Reock and Polsby-Popper are common tests
 - run 0 to 1
 - higher numbers indicating more compact districts.
- Some courts have given some weight to some measures but there's no consistent measure and no definitive test.
- The Proposed Plan improves the overall plan compactness and individual district compactness as compared to the 2013 Legislative Plan.

Proposed Plan	Reock	Polsby-Popper
	<i>(higher = more compact)</i>	
District Mean	0.42	0.39
District Minimum	0.26	0.21
District Maximum	0.60	0.59
District 1	0.48	0.59
District 2	0.36	0.35
District 3	0.47	0.47
District 4	0.38	0.3
District 5	0.51	0.48
District 6	0.32	0.21
District 7	0.47	0.37
District 8	0.48	0.55
District 9	0.57	0.37
District 10	0.26	0.27
District 11	0.32	0.36
District 12	0.31	0.27
District 13	0.41	0.53
District 14	0.53	0.59
District 15	0.34	0.3
District 16	0.6	0.41
District 17	0.38	0.36
District 18	0.43	0.35
District 19	0.35	0.34

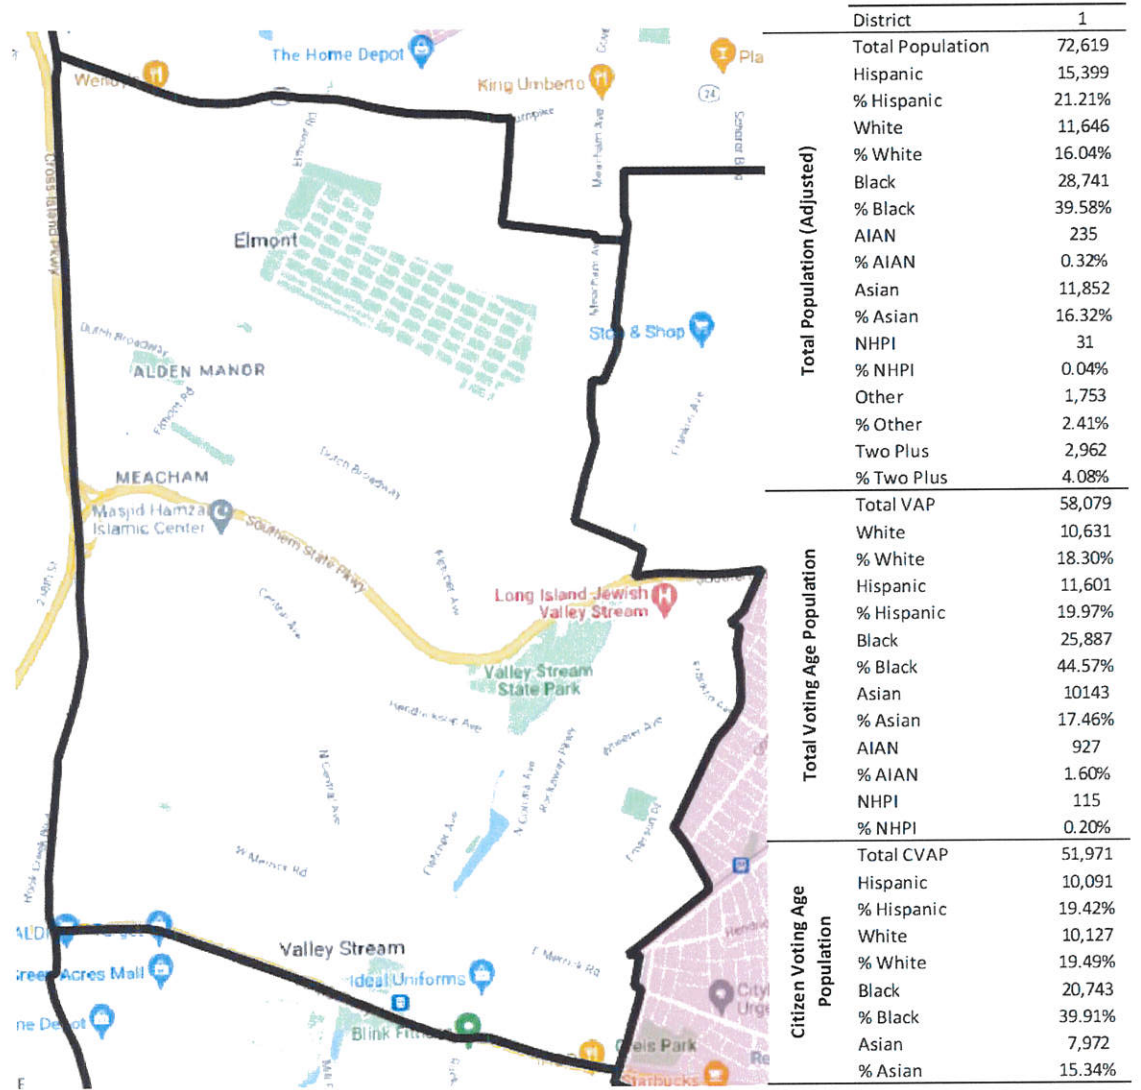

Proposed Plan: Preserve Political Subdivisions

Municipal Home Rule Law: "To the extent practicable, no villages, cities or towns except those having more than forty percent of a full ratio for each district shall be divided;..."

The Proposed plan complies fully with the MHRL by keeping all political subdivisions (villages, cities, and towns) subject to the MHRL in a single district.

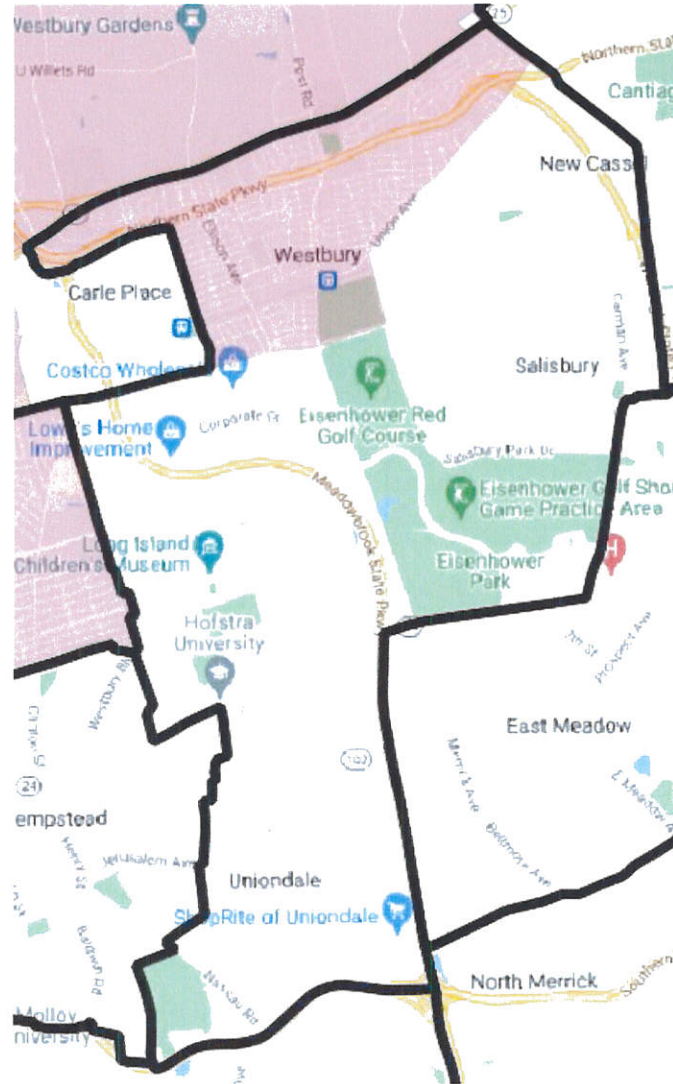

Proposed Plan: District 1

- Ideal population = 73,522
- District population = 72,619
 - Deviation from ideal: -903 / -1.23%
- Reock = 0.48
- Polsby-Popper = 0.59
- Majority/Minority District
 - Combined 65% VAP & 59% CVAP
- Performance Analysis: based on past elections, the minority preferred candidate wins by 33% to 39%
- MHRL: none

Proposed Plan: District 2

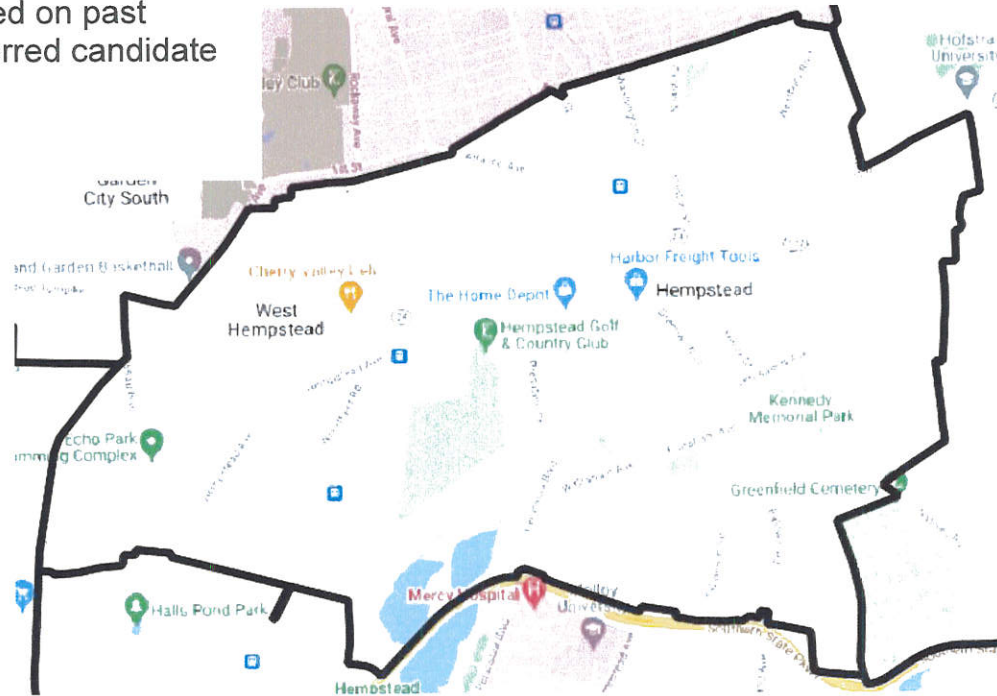

- Ideal population = 73,522
- District population = 74,617
 - Deviation from ideal: 1,095 / 1.49%
- Reock = 0.36
- Polsby-Popper = 0.35
- Majority/Minority District
 - Combined 64% VAP & 57% CVAP
- Performance Analysis: based on past elections, the minority preferred candidate wins by 24% to 37%
- MHRL: Westbury
