FISCAL 2025 BUDGET PREPARATION MANUAL

BRUCE BLAKEMAN
COUNTY EXECUTIVE

ANDREW PERSICH
BUDGET DIRECTOR

OFFICE OF MANAGEMENT AND BUDGET
ONE WEST STREET
MINEOLA, NEW YORK 11501
(516) 571-0413
FAX: (516) 571-6016

TO: Department Heads/Fiscal Staff
FROM: Andrew Persich, Budget Director
DATE: May 10, 2024
SUBJECT: Fiscal 2025 Budget Process

The OMB 2025 Budget development process will begin with a Seminar on Wednesday, June 26th at 11:00 am at the Legislative Chamber.

The 2025 Budget development instructions will be made available in the Presentation and Budget Manual and will be posted to the Office of Management and Budget Website: <https://www.nassaucountyny.gov/4338/Manuals-and-Seminars> by June 26th, 2024. Please contact your budget analyst if you require additional instructions on using the Budget Prep/ APEX system or have other questions.

Listed below are key dates in the Fiscal 2025 Budget Development Calendar.

Fiscal 2025 Budget Development Calendar

Date	Activity
05/31	Departmental Narratives Due Back to OMB
06/26	Budget Seminar – Legislative Chamber at 11:00 am
06/26	Apex/Budget Prep Opens
07/01	Multi-Year Plan Update Released
07/12	CPAR performance measures due back to OMB
07/19	Budget Submissions Due Back to OMB
08/02	Grants Budget Submissions Due Back to OMB
08/05-08/16	Review Budget Submissions/Departmental Meetings
08/30	Interdepartmental Service Agreements (ISAs) Due Back to OMB
09/16	Proposed Fiscal 2025 Budget and 2025-2028 Multi-Year Plan Released
TBD	Legislative Budget Hearings
10/30	Deadline for Legislature to Adopt Budget and Multi-Year Plan

PERFORMANCE MANAGEMENT /CPAR MEASURES

Performance Management links a department’s strategic goals and service objectives with measurable performance metrics that enable the department to measure performance, manage key areas of concern, and make informed resource allocation decisions. During the annual budget process, each department should reconfirm their goals and objectives, evaluate prior performance and establish performance measures that will serve as a useful management tool to gauge progress toward goals and toward achieving continuous improvement. In 2025, “Department-owned” performance measures will be monitored monthly using the *Metrics Management Scorecard* software tool and reported in the County Performance and Accomplishment Report (CPAR).

Existing 2024 Departmental CPAR performance measures, along with current performance targets and data, will be provided in a separate communication to follow. For the Fiscal 2025 submittal, existing and newly proposed CPAR performance measures must be consistent with the goals and objectives described in your Departmental narrative.

Each Department should be able to describe how a submitted CPAR performance measure specifically relates to a given goal and objective. In addition, CPAR measures should be:

- Numeric and monitored on a monthly or quarterly basis
- Within the Department’s direct managerial control or influence
- Assigned a realistic annual target (given the current economic environment) with the expectation for year-over-year improvement where feasible

2025 CPAR performance measures should be updated and submitted on the Excel spreadsheet that either has been or will be provided by Irina Sedighi of the Performance Management Unit (sample provided below). If you are simply updating an existing CPAR measure, then the only data required is a 2025 CPAR annual target.

If you are proposing a new CPAR measure, enter data in each column of the spreadsheet. Departments not yet using *Metrics Management Scorecard* to monitor CPAR measures are encouraged to do so as soon as possible and will also be required to enter data in each column on the spreadsheet.

If you have any questions regarding these instructions, please contact Irina Sedighi at 571-1459 or your Budget Analyst.

PURCHASING BUDGET GUIDELINES

Just-In-Time / Grainger Office Supplies

Departments must budget their Grainger supply needs in sub-object code DD400 for each responsibility control center within their department. If purchasing miscellaneous items not listed in the Grainger catalog or items restricted by the County from being ordered from Grainger, you may budget under a different DD sub-object code and order via an ADPICS requisition.

If departments do not budget properly in DD300 or DD400 and later determine they need to purchase Grainger items, a delay will occur in arranging for budgeted funds to be transferred from other DD lines. The process to transfer the funds requires the Department of Shared Services to send a request to the Comptroller's Office to transfer funds from the other DD line to the new line. Upon confirmation from the Comptroller's Office that the funds have been transferred, Shared Services must then open a corresponding account at JP Morgan Chase on behalf of that index code/sub-object code. Only upon confirmation that Chase has opened the appropriate line of credit and issued a new account number, can Shared Services advise vendors what the new corresponding account number is for their records. In addition, Vendors also require time to update the department's profile. The overall process can often take several days to a couple of weeks to complete. This delay can be avoided if departments comply with the correct procedure.

Effective immediately, toner should now be ordered through Just-In-Time (Grainger). Procurement through a blanket order with any other vendor should be discontinued. Specialty papers and toners, not available through Grainger, should also be budgeted separately and ordered via an ADPICS requisition. If you have any questions, please contact Office of Purchasing.

Staples Contract is under review

EXCLUDED / RESTRICTED ITEMS FROM JUST-IN-TIME

Audio Visual	Furniture, Files, Lamps	Surge Protectors
Bathroom Supplies	Hand Trucks	Telephones & Cell Phones
Binding Systems	Letter Folders	Televisions
Boards	Light Bulbs	Time Recorders

Peripherals: Cables,	Palm Pilots/PDAs	
Keyboards, Mice	Photocopiers	
Monitors, Computer Tool	Printers	
Kits	Recorders & Transcribers	
Fax Machines	Scanners	
Food	Shredders	

Directory of BB, DD and DE Sub-Object Codes

A copy of the Sub-Object Code directory for BB,DD, and DE are provided below.

The following list outlines the valid sub-objects available in the financial system (NIFS). An expanded list of sub-objects is also available within NIFS.

General Definition:

BB-Equipment: Equipment represents tangible purchases made by the County to assist and support County agencies and departments in performing and successfully executing their missions.

DD-General Expenses: General Expenses include a wide range of products and services required by departments to support service delivery. They include office, maintenance, medical, postage, recreational, automotive supplies, and gasoline.

DE- Contractual Services: A Contractual Service is work performed by an independent contractor for Nassau County. An independent contractor has specialized knowledge, expertise, experience, or capabilities. The County has determined that an outside entity is the best option to perform the appropriate service.

AN IMPORTANT NOTE ABOUT EQUIPMENT, GENERAL EXPENSES & CONTRACTUAL SERVICES (BB, DD & DE CODES)

In recent years, the Comptroller's Office has identified instances where the DD accounts have been used to record purchases of Equipment. Purchases of equipment are to be recorded in the BB object code. Purchases of supplies and general expenses are coded to the DD code. All contractual services are to be recorded in the appropriate DE code.

CAPITAL AND OPERATING BUDGET INTEGRATION

LINKING CAPITAL PROJECTS TO OPERATING BUDGET AND SERVICE DELIVERY IMPACTS

It remains our goal to achieve better integration between capital projects and operating budget and service delivery impacts. To achieve this, Departments proposing capital projects will document how the outcomes of capital projects impact operating costs and service delivery. These impacts should leverage opportunities for expense savings and enhanced revenue performance as well as incorporate any additional costs that may result from completion of the capital project. The Government Finance Officers Association (GFOA) considers this linkage an important standard in effective budgeting and has made documentation of capital budget impacts a mandatory criterion in their evaluation of quality and best practices in budgeting.

Departments proposing capital projects are required to submit a thorough and reasoned analysis to justify the County's capital investment. This analysis will ensure that such an investment is financially sound, captures all operating impacts and provides measurable improvement toward meeting service delivery objectives.

The Capital Project Submission Process

The capital project submission process requires the submitting department to calculate the project's impact on the operating budget, should the project be approved. To promote better communication of the effect that projects will have on the operating budget, the submitting departments must complete the Fiscal and Service Impact *Memorandum* (formerly the "Fiscal & Service Impact Worksheets"). The memorandum must include a narrative description of the project and provide as much detail on the project's impacts on both fiscal and constituent services as can reasonably be determined.

The memorandum must be given to the Office of Management and Budget and the Capital Program Office. OMB will ensure that the impacts adhere to the budget and multi-year plan targets. OMB will review the finances and service impacts in the context of the overall submission. Subsequent analysis and data may be requested from the submitting department to allow OMB to develop a recommendation.

FY 2025 Operating Budget Impacts

Your Operating budget submission should include a projection of the cost impact for capital projects scheduled to be completed/operational in FY 2025 and FY 2026. The projection should be consistent with the information provided on the Fiscal and Service Impact Memorandum. You should review the memorandum originally submitted at the time the capital project was requested and if necessary, update the fiscal and constituent services impacts to reflect the current projections (which should be consistent with your budget submission) and provide these projections to OMB.

Department of Information Technology Budget Guidelines

The Department of Information Technology, (NCIT), is a service department that provides technology solutions and services to County departments and agencies. NCIT plays an integral role in supporting County operations by designing, implementing and supporting technology solutions that improve the overall business efficiencies of each agency.

Equipment (Capital Funding)

When equipment is needed, an authorized representative from your department should submit a request to the NCIT help desk by calling 1-Help (1-4357) or email Helpdesk@nassaucountyny.gov. An IT Project Manager, along with the Equipment Manager, will visit you, address your needs, and create an equipment needs list that will be in line with your associated software. Only after the approval of funding will IT be able to move forward on your requests.

DE – Software and Maintenance Contracts

All information technology maintenance agreements are centralized and managed by NCIT. An annual review to capture all maintenance agreements will be conducted and maintained by the NCIT. Any software or technology solution requested for by an agency must be coordinated through NCIT. Departments with existing software maintenance handled by NCIT should review those agreements and advise IT's accounting unit of any changes, including costs.

All requests should be submitted by an authorized representative from your department to the NCIT help desk by calling 1-Help (1-4357) or emailing Helpdesk@nassaucountyny.gov. Typical funding sources include, in addition to operating, grants and technology capital projects.

Software needs are to be identified by the individual department with the assistance of an IT Project Manager. Approval by the IT Department is necessary. You will be contacted by an IT Project Manager to assist you in identifying your needs and requirements and preparing the submission of your request with the required justification.

Technology (Grant Funded)

Equipment or software purchases that are part of an approved grant budget must be coordinated with NCIT to eliminate duplication of hardware, software or services. We need to ensure that all information technology software and hardware purchases are consistent with both the standards of the NCIT Department as well as the County's overall strategic direction.

Technology (Capital Funded)

If you are planning a capital project in your department, the IT Department will need to work with you to develop the best utilization of available funds. An IT Project Manager will assist you with your technology project requests, justifications and the necessary IT approval process.

Interdepartmental Service Agreements

The process for developing 2025 Interdepartmental Service Agreements (ISA) between interdependent County departments will follow the same process as 2024.

The development and processing of ISA's will take place through the ISA application located at the following: <https://apex5.nassaucountyny.gov/ords/f?p=DASH>.

All departments are required to provide interdepartmental services expense forecasts; however, ISAs will only be required for primary buyer units/departments. Only primary buyer units/departments will be allocated an Interdepartmental Charge (HF) budget. Primary buyer units/departments are defined as either a cost segment of a major county operating fund or are routinely eligible for federal and state reimbursement of expenses. For GRANTS, please use revenue code BW for inter-fund charges revenue and expense code HH for inter-fund charges expense.

Primary Buyer Units/Departments

- Fire Commission
- Police Headquarters
- Police District
- All Health and Human Services Departments
- Economic Development Grant Units
- Office of Housing
- Office of Community Development
- Public Works

Primary seller departments (noted below) will prepare their ISAs as required in the ISA instructions (see sample on following pages) for primary buyer unit/departments only. Once the Seller department ISA has been approved, the ISA manager for the indicated Buying department will be notified through the app. This will be an iterative process until both departments sign off on the ISA. At this point the app will notify appropriate OMB staff to be incorporated in the budget.

Primary Seller Departments

- Information Technology
- Police Headquarters
- Records Management
- Information Technology - Printing Graphics and Mail Services
- Public Works
- Shared Services
- Sheriff's Department

Other departments (sellers and buyers not described above) may participate in this process but only if the ISA is fully agreed to in advance by both parties.

ISA Application Instructions

Seller Departments will initiate the ISA process for the buying departments.

Form Definitions

- If you are not able to gain access because you are a new employee or part of a new department, please contact OMB at ISAOMB@nassaucountyny.gov.
- The ISA # will be automatically generated once the ISA is submitted. As you work on an ISA please make sure to hit save on a regular basis. Unsaved changes will not be available if you exit without saving.
- The Division is the cost center for the department if applicable.
- The ISA Manager is usually someone on the fiscal staff of the buyer and seller departments. If the ISA manager is not found in the dropdown, please contact OMB at ISAOMB@nassaucountyny.gov.
- The Period is the period of performance; in most cases this will be annual (12 months).
- The Requirements and Specifications should briefly explain what service or product is being provided and what the quality and schedule expectations are.
- The Resource Plan should identify what resources (staffing, equipment, vendors, etc.) will be dedicated to the accomplishment of the Requirements and Specifications. Please upload backup/detail documentation for the charges. These will be provided to the buying department. Only one file may be uploaded. Any upload will overwrite previous uploads.
- The Reporting Requirements establish the necessary level of communication/coordination for the successful completion of the ISA. The type and content of status reports should be identified. Monthly status reports are recommended but quarterly status reports may be more appropriate.
- The Price defines the cost (Salary, Fringe Benefits and OTPS expenses) of providing the services or products defined by the ISA. For ISA purposes available fringe benefit rates should be applied to salary expenses. Current rates may be found under the RESOURCES tab in the application.

Indirect Costs

Seller Departments that need to claim indirect costs expense should refer to the most recent indirect cost rate allocation spreadsheet which is located on the website under the RESOURCES tab.

The Seller Account Information is the selling department’s appropriate index, revenue object and revenue sub-object codes (BJ - in most cases 7800 designated “Interdepartmental Revenues”). The Buyer Account Information is the buying department’s index code along with the expenditure object code HF and appropriate sub-object code for the service or product being provided.

PROCESS

- Login is the username and password you use to log into your computer.
- The Selling Department has to initiate an ISA under the “ISAs” tab, by clicking Add New ISA +

- Once a new ISA is initiated it will be **In Progress** while it is being completed by the Selling department. Every section needs to be completed and there is the option of uploading back up files. While the ISA is being completed, changes can be saved by clicking the blue “Save Changes” button. Once completed the yellow Save Changes and Submit ISA needs to be chosen.

FISCAL 2025 BUDGET PREPARATION MANUAL

Department Information

Status: **In Progress**

* Type of Service: [Maintenance; maintenance; vehicle; investigations]

* Buying Department: [Select -]

* Selling Department: **Budget**

* Selling Division: [Select -]

An example of the entire ISA screen is presented in Appendix C.

If you hit the Save Changes button, the ISA will be saved in the list of In Progress ISAs on “ISAs” tab. You can come back to your ISA, by hitting the pencil icon under Actions within the ISAs tab.

Highlighted records require your review.

Actions	ISA #	Selling Department	Selling Division	Selling ISA Manager	Buying Department	Buying Division	Buying ISA Manager	Period From	Period To	Created On	Created By	Pending Approval From	Status	Copy
		Information Technology	Application Support	Irina Sedighi	Social Services	Administration	Irina Sedighi	01/01/2022	12/31/2022	04/27/2021 11:04AM	ISEDIGHIJT		In Progress	

The Account Information section has to equal to the Pricing Details section. Please note that the chargeback codes have to be correct or the ISA will be denied by the Budget department. If indirect costs apply, they are to be manually calculated and included in the Pricing Details section of the form. To add pricing detail, click “Add Row” and complete description and pricing.

To add Account Information, click “Add Row”. A0 pop-up form will appear, which must be populated with both buyer and seller information.

FISCAL 2025 BUDGET PREPARATION MANUAL

Once the ISA is approved by Budget, there will be a print button available on the top right for the selected ISA.

The **ISA Summary Forms** tab is provided for user reporting purposes where all of the Department's ISAs can be printed.

Contact Irina Sedighi with any questions.

GRANT BUDGET PLANNING - 2025

The FY 2025 Budget Summary Book will include the FY 2025 Grant Plan which will be based on the information contained in the Grant Budget Planning system as input by each of the departments. All approved, pending, and potential grant awards anticipated during 2025 and projected for 2026 through 2028 must be entered into the 2025 Grant Budget Planning System.

During the 2025 Budget Preparation season, Departments should list **all** grants, including those that they are considering applying for in late 2024 through 2025. Values entered are considered projections/estimates based on the best information the department has at the time. The Administration and OMB will not hold departments to these projections.

If Departments have questions regarding the input requirements, they can contact Daniela Capozzo.

Guidelines for Grant Budgeting

Departments must complete the Grant Plan Basic Information Form and Grant Amounts detail for each grant. Starting in the 2025 Budget Preparation season, the 2025 Budget will be pre-populated for those grants that had been created/entered for the 2024 Budget plan with a 2025 out year plan. If there is a prepopulated 2025 Grant entry, then the Department will have to review previously entered information and revise accordingly before final submission.

To get started, select the 2025 year from the Grant Year dropdown table and a resulting list of prepopulated grant line items will be listed. Click on the “pencil icon” to the left of each Grant line item to open the Grant Basic Info Screen. Details will have been pre-populated from prior year entries. Departments need to review the previous entries to ensure if they are still valid and correct. There will be required fields that need to be completed by the Departments. Departments will not be able to apply changes or finalize submissions unless all fields are entered.

If Departments need to enter new grants, then the submitter must click on the “Create” button to the right of the screen which will then bring you to the Grants Basic Input Screen. As a reminder, Departments should be careful in entering the Grant Name and Grant Code fields exactly as it was entered in the prior year in order for the base expense and revenue details to be displayed in the next budget screen.

For the 2025 Grants Plan, Departments will also be prompted to enter additional information before it can move onto the Expense and Revenue detailed input screen. The following information will need to be added:

- Is there a Matching Component to the Grant funding? If so, what is the funding source for the match? What is the amount or percentage required?

Lastly, Departments will have the opportunity to save changes by clicking “Apply Changes” button before final submission. Once Departments are satisfied with each individual grants plan submission, they can finalize submission by clicking on the “Confirm Grant Info has been updated” button.

Fringes (AB) and Indirect Costs: Most grants include salary appropriations. If there is a salary (AA) appropriation, the grant should also include all fringe costs eligible for reimbursement by the grant. If departments are unsure of the fringe rate, please contact Jeff Nogid for the appropriate rate. Based on each grant reimbursement criteria, the grant manager should review charging direct and indirect costs. Include only indirect costs that will be reimbursed by the grant.

For grants received from another department within the County, as a sub-grantee, each department receiving grant funds must submit a separate budget. Examples are the Urban Area Security Initiative and State Homeland Security Grants through Emergency Management, where the programs provide funds to County departments to implement programs designed within categories of the functions that the sub-grantee department provides.

The expense appropriation is the annual budget for the grant, and the revenue is the funding source (federal, state, or local). The revenue needs to equal the expense total. The revenue and expense must be entered at the sub-object code level:

- Federal: funds received from the Federal Government
- State: funds received from New York State including pass-thru funds from the Federal Government
- Other Non-County Sources: funds received from sources excluding Federal, New York State or Nassau County

Enter the projected (or actual if available) total amount of the grant funding expected for each year.

Definitions

Direct Costs: Includes all items that can be categorically identified and charged to the specific project, such as personnel, fringe benefits, professional services, travel, equipment, supplies, communications, computer time, and publication charges.

Contract Costs: Grants may allow for utilizing outside professional services to meet the goals and objectives of the grant. If the DE sub-object is to be input onto the Grants Budget Planning System, then additional information will need to be included in the notes sections. Specifically, note the Vendor name (if available for existing multi-year contracts) and what type of services are being procured. If vendors have yet to be procured, then input what type of services are to be procured.

After all direct costs have been determined and assigned to the grant and other activities as appropriate, what remains are:

Indirect Costs: Includes costs not readily identifiable to a specific project or activity. The costs of maintaining buildings, grounds and equipment, accounting services, and general administrative expenses are considered types of indirect costs. Such costs may or may not be allowed by a funding source, and others may place a ceiling on the percentage allowed in each grant situation. Indirect costs are generally calculated as a percentage of the total direct costs of the project minus any capital or equipment expenses. Indirect costs are comprised of three types:

1. **Departmental Indirect Costs:** These are costs incurred by the department that do not benefit the grant objective 100%, (e.g., personnel costs for a department director who oversees the grant, among other functions; an attorney who works in the department and devotes a portion of his/her time to the grant, etc.). Refer to the most recent indirect cost rate allocation spreadsheet which is located on the website.
2. **Countywide Indirect Costs:** These are the costs of central government services distributed through the central service allocation plan that will be distributed by OMB for Grants once 2022 is finalized (MAXIMUS Federal OMB A-87 Central Services Cost Allocation Plan)
3. **Other Department Costs: Indirect Costs –** These costs include the following:

Fleet Maintenance	Building Occupancy
Purchasing	Records Management
Information Technology	Postage Charges
Printing Charges	Gasoline
