

Long Beach Road Resurfacing, Drainage & Traffic Safety Improvements

The scope of work involves pavement, drainage, and traffic safety improvements along Long Beach Road in Rockville Center and South Hempstead to repair the poor pavement, eliminate numerous locations of ponding and increase the capacity of the existing drainage systems, and address safety concerns in front of Covert Elementary School. Project limits are from Demott Ave to Woodland Drive, approximately 1.2 miles in length. This work includes but not limited to construction of new drainage structures including catch basin, pipes, leaching basins and dry swales, modifying the profile of the roadway, curb ramps, and sidewalks, curbs of various types (including flush, curb and curb and gutter) pavement markings, traffic loops, topsoil and seeding and other incidental work.
