## EXECUTIVE SUMMARY

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) was retained by Las Vegas Sands Corp (the User) to prepare a Phase I Environmental Site Assessment (ESA) for the property at 101 James Doolittle Boulevard in Uniondale, New York (the Subject Property). The Subject Property, identified on the Nassau County Tax Map as Section 44, Block F, Lots 326, 401, and 402, is bound by a parking lot followed by Charles Lindbergh Boulevard to the north, James Doolittle Boulevard followed by the Francis T. Purcell Preserve to the east, Hempstead Turnpike followed by a commercial building to the south, and the Nassau Veterans Memorial Coliseum and associated parking to the west. The about 14.6-acre Subject Property is developed with a hotel comprised of a one-story podium with two 10-story towers and an attached 11-story tower, surrounded by asphalt-paved parking lots and landscaped areas.

This Phase I ESA was completed in accordance with ASTM International (ASTM) E1527-13 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) and the United States Environmental Protection Agency (USEPA) All Appropriate Inquires (AAI) Rule, for the purpose of identifying recognized environmental conditions (REC), historical RECs (HREC), and controlled RECs (CREC).

Based on information obtained during the visual inspection of the Subject Property; review of environmental databases and historic information; and contact with federal, state, and local agencies, the following RECs and HRECs were identified.

### **REC 1: Historical Use of the Subject Property**

The Subject Property and several adjoining and surrounding properties were occupied by Mitchel Air Force Base from the 1910s through the mid-1960s. Use prior to 1910 also included military facilities dating back to the revolutionary war. According to a December 2009 Site Inspection Report for Mitchel Field, prepared for the United States Army Corps of Engineers (USACE), the northeastern portion of the Subject Property is within the former Skeet Range (MRS 2) and the southwestern corner of the Subject Property is within the former Machine Gun Range (MRS 5). Soil samples collected during a 2009 investigation by the USACE found iron above the USEPA Residential Direct Contact Soil Screening Level and lead above the USEPA Interim Ecological Screening Levels; however, no samples were collected from the Subject Property. The most recent publically available information indicates that New York State Department of Environmental Conservation (NYSDEC) classifies the site as a "Class P" Inactive Hazardous Waste Disposal Site (SHWS) site, but NYSDEC has yet to complete an overall environmental assessment of the former airfield.

Undocumented spills or releases of solvents, chemicals, and/or other hazardous substances associated with this historical use may have adversely affected soil, groundwater, and/or soil vapor on the Subject Property.

### **REC-2: Historical Petroleum Bulk Storage at the Subject Property**

According to Nassau County Fire Marshal records, an underground storage tank (UST) of unknown size was installed on December 17, 1982 on the Subject Property. The UST is listed as removed; however, UST closure documentation was not provided. The absence of UST location information and closure documents is considered a REC.

### **REC-3: Current and Historical Use of the Adjoining and Surrounding Properties**

Nassau Energy Corporation, located about 570 feet north of the Subject Property (hydraulically up gradient), has operated as a power plant facility since the 1960s. The Nassau Energy Corp. is also identified under the facility names Suez Energy Generation, Trigen Nassau Energy, and Trigen Cogeneration Plant. The facility is listed in the RCRA generator databases for generation of corrosive-, silver- and halogenated-hazardous wastes and houses multiple aboveground storage tanks (ASTs) containing of solvents, acids and waste oil. Undocumented spills or releases of solvents, chemicals, or other hazardous substances associated with these current operations may have adversely affected groundwater, and/or soil vapor on the Subject Property.

The Purex-Mitchell Field site, located about 5,061 feet northwest of the Subject Property (hydraulically up gradient), operated as an industrial facility for chemical distribution from 1955 to 1977. Information on the facility indicates that a chlorinated solvent plume near the site is related to former chemical distribution operations. Remediation to date has included contaminant recovery wells, air stripping, and a slurry wall constructed to restrict migration of groundwater contaminants. The results of a 1992 soil investigation indicated the soil clean-up objectives had been met; however, groundwater remediation is ongoing and soil vapor has not been evaluated. Based on proximity, contaminant extents and solubility, migration of contaminants in groundwater, and absence of information regarding impacts to soil vapor, this historical operation may have adversely affected groundwater, and/or soil vapor on the Subject Property.

### **REC-4: Known Area-Wide Groundwater Contamination**

The Old Roosevelt Field Contaminated Groundwater Area (USEPA ID No. NYSFN0204234) and New Cassel/Hicksville Groundwater Contamination (USEPA ID No. NY0001095363), are two National Priority List (NPL) sites located over 4,000 feet north and upgradient of the Subject Property. Operations at the two sites include aviation activities from (1911 to 1955) and various industrial operations (time unknown), respectively. Both sites are considered to have contributed to a chlorinated solvent groundwater plume that has impacted public supply wells in the area of

the Subject Property. Contaminants of concern include carbon tetrachloride, 1,1-dichloroethene (1,1-DCE), tetrachloroethene (PCE), and trichloroethene (TCE). The exact source of the contamination is unknown, and as per the database entry, the USEPA is considering various alternatives for remediation. Documented chlorinated solvent impacts to groundwater in the vicinity of the Subject Property is considered a REC.

### **Historical Recognized Environmental Conditions**

An HREC is a REC resulting from a past release of hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meets unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

#### **HREC-1: Historic Spills on the Subject Property**

One closed spill is associated with the Subject Property, and is identified as a HREC:

- NYSDEC assigned Spill No. 00-01783 to the Subject Property on May 11, 2000 after contamination was encountered during the removal of a 550-gallon underground fuel oil storage tank. Cleanup of the spill was completed and NYSDEC closed the spill on October 30, 2000.

### **Business Environmental Risks**

A Business Environmental Risk (BER) is defined by ASTM 1527-13 as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

The following BERs were identified:

#### **BER 1 – NYSDEC SHWS “Class P” Classification**

The former Mitchel Field military airbase, which is inclusive of the Subject Property, is listed in the Inactive Hazardous Waste Disposal Site (SHWS) database, which is the New York State Superfund. The listing has a Class P (potential registry site) classification, indicating that there is a potential for concern about site contamination. Information regarding a Class P site is preliminary in nature and unverified because the NYSDEC's investigation of the site is not yet complete. While no regulatory requirement currently exists for the Subject Property, NYSDEC may eventually require investigation, remediation and reporting. Subsequent investigation and

reporting related to the program may result in additional costs or schedule delays for future development.

## **BER 2 – Possible Military Munitions**

The 2009 USACE investigation of the former Mitchel airfield also addressed potential munitions, including Unexploded Ordinance (UXO). Areas of concern identified included the northeastern portion of the Subject Property, located within former MRS 2, and the southwestern corner of the Subject Property, located within former MRS 5. According to the 2009 USACE report, the explosive risk for these areas is low. The report indicated that spent shell casings were identified during the development of the sports field southwest of the Subject Property, and the presence of smaller arms rounds (non-explosive) and/or shell casings is likely in the former munition areas of the Subject Property. The presence of munitions may result in premium costs for identification/delineation, handling and disposal during construction.

## **Non-Scope Considerations**

A Non-Scope Consideration is identified by ASTM E1527-13 as an environmental issue or condition at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM E1527-13.

The following non-scope consideration was identified:

A preliminary hazardous building materials survey was conducted on October 18 and November 14 and 15, 2022 to identify the presence/absence of asbestos-containing material (ACM), lead-based paint (LBP), and/or PCB-containing material. ACM was identified in the building surveyed areas. Identified ACM must be removed by a certified asbestos abatement contractor in accordance with applicable federal, state, and local regulations prior to being disturbed, including maintenance, renovation, or demolition activities. Generally, sampled building materials did not contain detectable concentrations of lead and PCBs above applicable standards.

## **1.0 INTRODUCTION**

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) was retained by Las Vegas Sands Corp. (the User) to prepare a Phase I Environmental Site Assessment (ESA) for the property at 101 James Doolittle Boulevard in Uniondale, New York (the Subject Property). This Phase I ESA was performed for the User in general accordance with ASTM International (ASTM) E1527-13 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) and the United States Environmental Protection Agency's (USEPA) All Appropriate Inquiries (AAI) Rule. The purpose of this Phase I ESA is to accomplish the following:

1. Identify Recognized Environmental Conditions (REC) in connection with the Subject Property, as defined in The Standard Practice for Environmental Site Assessments: Phase I ESA Process, Designation E1527-13, which states: The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.
2. Provide services consistent with the USEPA 40 Code of Federal Regulations (CFR) Part 312 Subpart C Standards and Practices §312.20 AAI Rule.

### **1.1 Scope of the ESA**

This Phase I ESA was conducted using a standard of good commercial and customary practice that is consistent with ASTM E1527-13. No significant additions, deletions, or deviations to ASTM E1527-13 were made in connection with this report, as described in Section 8.0. In general, the scope of this assessment consisted of obtaining information from the User; reviewing reasonably ascertainable information and environmental data relating to the Subject Property; reviewing maps and records maintained by federal, state, and local regulatory agencies; interviewing persons knowledgeable about the Subject Property; and conducting a site reconnaissance. The specific scope of this assessment included the following:

1. A site reconnaissance to characterize conditions and assess the Subject Property's location with respect to adjoining and surrounding property uses and natural surface features. The reconnaissance included the surrounding roads and observations of surrounding properties from public rights-of-way to identify obvious potential

environmental conditions on neighboring properties. The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Subject Property and then progressing to adjoining and surrounding properties. Photographs taken as part of the site reconnaissance are included in Appendix A.

2. A review of the response to the User/Client Questionnaire. The completed User/Client Questionnaire is included in Appendix B.
3. A review of environmental databases maintained by the USEPA, state, and local agencies within the approximate minimum search area. The environmental database report was provided by Environmental Data Resources, Inc. (EDR), and is included in Appendix C.
4. Filing of Freedom of Information Act (FOIA) requests with federal, state, and local agencies. Copies of the FOIA requests are included in Appendix D.
5. A review of Nassau County Land Records and the Town of Hempstead Zoning Map. Available Nassau County Land Records and the Zoning Map are included in Appendices E and F, respectively.
6. A review of physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils, and hydrologic data.
7. A review and interpretation of aerial photographs, historical topographic maps, and city directories to identify previous activities on and in the vicinity of the Subject Property. Copies are included in Appendices G, H, and I, respectively.
8. A review of environmental lien searches for the Subject Property. Copies of the environmental lien search reports are included in Appendix J.
9. A review of published radon occurrence maps to evaluate whether the Subject Property is located in an area with a propensity for elevated radon levels.

## **1.2 Assumptions, Limitations, and Exceptions**

This Phase I ESA report was prepared for Las Vegas Sands Corp for the Subject Property at 101 James Doolittle Boulevard in Uniondale, New York. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the Subject Property addressed herein, or by any other third party without a written authorization from Langan.

Langan's scope of services, which are described in Section 1.1, was limited to that agreed to with the User and no other services beyond those explicitly stated are implied. The services performed and agreed upon for this effort comports to those prescribed in the ASTM E1527-13.

Intrusive sampling (i.e., soil borings and groundwater sampling) was not performed as part of this Phase I ESA.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the Subject Property. The purpose of this investigation was limited to determining if there are any RECs affecting the Subject Property. It should be understood that even the most comprehensive Phase I ESA might fail to detect environmental liabilities at a particular Subject Property. Therefore, Langan cannot “insure” or “certify” that the Subject Property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our client, with the customary standard of care exercised by professionals performing similar services under similar circumstances within the same jurisdiction.

The conclusions, opinions, and recommendations provided in this report are based solely on the specific activities as required for the performance of ASTM E1527-13 and are intended exclusively for the purpose stated herein, at the specified Subject Property, as it existed at the time of our site visit.

## 2.0 SUBJECT PROPERTY DESCRIPTION

### 2.1 Location and Description

The Subject Property is located at 101 James Doolittle Boulevard in Uniondale, New York, and is identified on the Nassau County Tax Map as Section 44, Block F, Lots 326, 401, and 402. The about 14.6-acre Subject Property is developed with a hotel comprised of a one-story podium with two 10-story towers and an attached 11-story tower, surrounded by asphalt-paved parking lots and landscaped areas. The Subject Property is bound by a parking lot followed by Charles Lindbergh Boulevard to the north, James Doolittle Boulevard followed by the Francis T. Purcell Preserve to the east, Hempstead Turnpike followed by commercial building to the south, and the Nassau Veterans Memorial Coliseum and associated parking to the west. A Subject Property Location Map is included as Figure 1.

According to the United States Geological Survey (USGS) Freeport Quadrangle 7.5-minute Series Topographic Map, the elevation of the Subject Property is about 78 feet above mean sea level (msl), and the surrounding area slopes gradually to the south-southeast. Based on observations of the surrounding area during the site reconnaissance, the Subject Property is located within a suburban area characterized by commercial and residential buildings, private and public institutions, and parks or preserved land. Site reconnaissance photographs are included in Appendix A.

Surrounding property use is summarized in the following table:

Direction	Block	Lot	Adjoining Properties	Surrounding Properties
North	F	415	asphalt-paved parking lot	Charles Lindbergh Boulevard followed by Nassau Energy Corporation energy plant and a Nassau Community College campus
East	James Doolittle Boulevard		Francis T. Purcell Preserve	Meadowbrook Parkway followed by commercial buildings
	F	405		
South	Hempstead Turnpike		340 RXR Plaza (commercial building)	Commercial, residential and institutional buildings
	340	466		
West	F	351, 411, 412 and 415	Nassau Coliseum and associated parking	Parking followed by Earl Ovington Boulevard, Hofstra University campus

## 2.2 Description of Subject Property Improvements

Improvements at the Subject Property are summarized in the following table:

SITE IMPROVEMENTS	
<b>Size of the Subject Property</b>	About 14.6 acres
<b>Buildings/Spaces/Structures</b>	Lot 326: One hotel building comprised of a one-story podium and three 10- and 11-story towers, associated parking.
<b>Surface Water</b>	None
<b>Potable Water Source</b>	Municipal
<b>Sanitary and Storm Sewer Utilities</b>	Municipal
<b>Electrical Utilities</b>	PSEG Long Island
<b>Natural Gas Utilities</b>	PSEG
<b>Construction Completion Date</b>	Main building (1982); 11-story tower (early 1990s)
<b>General Construction Type</b>	Steel frame and concrete masonry
<b>Heating, Ventilation and Air Conditioning (HVAC) System Type</b>	Central air ductwork system supplied by air handler units located on the third-floor step-out for public areas.  Each of the 617 hotel units are heated and cooled with individual electric heating and air conditioner units.
<b>Emergency Power</b>	A diesel-powered backup generator is located along the west exterior wall of the hotel building.

## 2.3 Title Records

Langan researched ownership records for the Subject Property on the Nassau County Clerk's Office website for online records (<https://i2f.uslandrecords.com/NY/Nassau/D/Default.aspx>). Additional ownership information was obtained from an environmental lien search (see Section 4.6.4). Not all prior deed records could be obtained; however, available title information is summarized below.

<b>Lot</b>	<b>Date</b>	<b>Document Type</b>	<b>First Party</b>	<b>Second Party</b>
326	Prior to 1994	NA	NA	County of Nassau
	3/4/1994	Agreement Deed	County of Nassau	Coliseum Hotel Assoc./Sumitomo Bank
	1/5/2000	Agreement Deed	Coliseum Hotel Assoc.	SP-Coliseum LLC/M-Coliseum LLC
	12/20/2005	Agreement Deed	BR-Coliseum, LLC (M-Coliseum LLC)	Lighthouse Hotel Development I, LLC
326, 401, 402	12/29/2005	Agreement Deed	Lighthouse Hotel Development I, LLC	Town of Hempstead Industrial Development Agency
		Agreement Deed	Town of Hempstead Industrial Development Agency	Lighthouse Hotel Development I, LLC
	2/28/2007	Agreement Deed	Lighthouse Hotel Development I, LLC	Rex Uniondale Hotel LLC
	5/21/2007	Agreement Deed	Rex Uniondale Hotel LLC	Marriott Hotel Services Inc.
	11/5/2014	Agreement Deed	CBW Uniondale Hotel LLC	101 Uniondale LP
	3/18/2015	Agreement Deed/Quitclaim Deed	Hempstead Industrial Development Agency	Nassau County Industrial Development Agency
	3/18/2015	Agreement Deed	Nassau County Industrial Development Agency	101 Uniondale LP
	1/31/2019	Agreement Deed	101 Uniondale LP	Royal Blue Hospitality LLC
	1/31/2019	Agreement Deed	Royal Blue Hospitality LLC	Royal Blue Hospitality LLC

Langan's review of ownership records did not reveal any RECs associated with the Subject Property.

### **3.0 USER PROVIDED INFORMATION**

#### **3.1 User Questionnaire**

Per ASTM E1527-13, a User questionnaire was provided to the User to inquire about specialized information related to the Subject Property. Marc Gross of Las Vegas Sands Corp/LVS NY Holdco, LLC completed the questionnaire. Mr. Gross stated that he is not aware of any environmental liens or land use limitations at the Subject Property. According to Mr. Gross, the purchase price of the Subject Property reasonably reflects fair market value and is not attributable to any contamination known or believed to be present at the Subject Property. The completed User questionnaire is included in Appendix B.

#### **3.2 Previous Environmental Reports**

Previous environmental reports were not provided for the Subject Property.

#### 4.0 ENVIRONMENTAL RECORDS

Environmental Data Resources, Inc. (EDR) provided a regulatory database search that is included in Appendix C. The EDR report provides a listing of sites identified on select federal and state standard source environmental databases within the approximate search radius specified by ASTM E1527-13. Langan reviewed each environmental database on a record-by-record basis to evaluate whether the identified sites represent a potential for environmental impact to the Subject Property. Langan also reviewed “Orphan Sites” listed within the report. Orphan Sites are those sites that could not be mapped due to inadequate address information. Any Orphan Sites that were identified by Langan within the ASTM search radii, either during the site reconnaissance or by cross-referencing to mapped listings, are addressed in the discussion below.

The following table lists the number of sites identified in standard and additional environmental record databases, within the prescribed search area and appearing in the EDR Report.

<b>DATABASE RECORD SUMMARY</b>			
<b>Database Reviewed (Date of government version)</b>	<b>Minimum Search Area</b>	<b>Subject Property listed</b>	<b>Number of Sites Within Minimum Search Area</b>
<b>USEPA DATABASES</b>			
National Priorities List (NPL) (7/26/2022)	1 Mile Radius	No	2
Delisted NPL (7/26/2022)	1 Mile Radius	No	0
Superfund Enterprise Management System (SEMS, formerly CERCLIS) and SEMS-Archive (formerly known as CERCLIS-NFRAP) (7/26/2022)	1/2 Mile Radius	No	0
Resource Conservation and Recovery Act (RCRA) Corrective Reports (CORRACTS) (6/20/2022)	1 Mile Radius	No	0
RCRA Treatment, Storage, and Disposal Facilities (TSDF) (6/20/2022)	1/2 Mile Radius	No	0
RCRA Generators (Large Quantity Generator [LQG], Small Quantity Generator [SQG], Conditionally Exempt Small Quantity Generator [CESQG], Non-Generators [NonGen]) (6/20/2022)	Subject Property and Adjoining Properties	Yes	9

<b>DATABASE RECORD SUMMARY</b>			
<b>Database Reviewed (Date of government version)</b>	<b>Minimum Search Area</b>	<b>Subject Property listed</b>	<b>Number of Sites Within Minimum Search Area</b>
Facility Index System (FINDS) (5/13/2022)	Subject Property	Yes	1
<b>USEPA DATABASES (Continued)</b>			
Environmental Response Notification System (ERNS) (6/14/2022)	Subject Property	No	0
Federal Engineering Controls (US ENG CONTROLS [ECs]) Sites Lists (5/16/2022)	Subject Property	No	0
Federal Institutional Controls (US INST CONTROLS [ICs]) Sites Lists (5/16/2022)	Subject Property	No	0
<b>NYSDEC DATABASES</b>			
Inactive Hazardous Waste Disposal Sites (SHWS) and Delisted Registry Sites (DEL SHWS) (5/9/2022)	1 Mile Radius	No	2
Solid Waste or Landfill Facilities (SWF/LF) (6/29/2022)	1/2 Mile Radius	No	0
Leaking Storage Tanks (LTANKS) (5/9/2022)	1/2 Mile Radius	No	14
SPILLS Information Database (NY SPILLS) (5/9/2022)	1/8 Mile Radius	Yes	3
New York Engineering Controls (NY ENG CONTROLS) Sites Lists (5/9/2022)	Subject Property	No	0
New York Institutional Controls (NY INST CONTROLS) Sites Lists (5/9/2022)	Subject Property	No	0
NY Voluntary Cleanup Program (VCP) (5/9/2022)	1/2 Mile Radius	No	0
NY Brownfields (5/9/2022)	1/2 Mile Radius	No	0
Solid Waste Disposal Sites Registered Recycling (SWRCY) Facility List (6/29/2022)	1/2 Mile Radius	No	0
Chemical Bulk Storage (CBS) Underground Storage Tank (UST), Aboveground Storage Tanks (AST) Databases (6/21/2022)	Subject Property and Adjoining Properties	Yes	1
Major Oil Storage Facilities (MOSF) UST and AST Databases (6/21/2022)	Subject Property and Adjoining Properties	No	0

<b>DATABASE RECORD SUMMARY</b>			
<b>Database Reviewed (Date of government version)</b>	<b>Minimum Search Area</b>	<b>Subject Property listed</b>	<b>Number of Sites Within Minimum Search Area</b>
Registered and Historical Drycleaners (NY DRYCLEANERS) and EDR US Historical Cleaners (8/30/2022)	1/4 Mile Radius	No	0
<b>EDR (PROPRIETARY) DATABASES</b>			
EDR Former Manufactured Gas Plant (MGP) Sites (N/A)	1 Mile Radius	No	0

Formerly Used Defense Sites (FUDS) (8/11/2022)	N/A	No	1

NYSDEC – New York State Department of Environmental Conservation

N/A – Not Applicable; databases are reviewed as part of the Phase I ESA but not required as per ASTM E1527-13.

A description of the reviewed databases is included in the EDR Report (Appendix C). A summary of sites identified within the prescribed search area is presented below.

#### **4.1 Federal Agency Database Findings**

The Subject Property and/or sites within the respective minimum search distances as specified by ASTM E1527-13 were not listed in the following Federal Agency databases: delisted NPL, SEMS (formerly CERCLIS) and SEMS-Archive (formerly known as CERCLIS-NFRAP), RCRA CORRACTS, RCRA TSDF, ECs, or ICs.

#### **NPL**

The National Priority List (NPL), also known as the Superfund database, is a subset of the Superfund Enterprise Management System (formerly CERCLIS). The NPL identifies over 1,200 sites for priority cleanup under the Superfund Program. The Subject Property was not identified in the NPL database; however, two NPL sites with identified within the minimum search area of 1 mile. Both NPL sites, Old Roosevelt Field Contaminated Groundwater Area (USEPA ID No. NYSFN0204234) and New Cassel/Hicksville Groundwater Contamination (USEPA ID No. NY0001095363), are located over 4,000 feet north and upgradient of the Subject Property; however, both sites are considered to have contributed to a chlorinated solvent groundwater that has impacted public supply wells in the area of the Subject Property. Contaminants of concern

include carbon tetrachloride; 1,1-dichloroethene (1,1-DCE); tetrachloroethene (PCE); and trichloroethene (TCE). The exact source of the contamination is unknown, and as per the database entry, the USEPA is considering various alternatives for the site. Based on documentation of known chlorinated impacts to groundwater in the vicinity of the Subject Property, these listings are considered RECs.

### **RCRA Generators**

The Resource Conservation and Recovery Act (RCRA) Generators database is USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. Large quantity generators (LQG) generate over 1,000 kilograms of hazardous waste or over 1 kilogram of acutely hazardous waste per month; small quantity generators (SQG) generate between 100 and 1,000 kilograms of hazardous waste per month; conditionally exempt small quantity generators (CESQG) generate less than 100 kilograms of hazardous waste or less than 1 kilogram of acutely hazardous waste per month; and RCRA non-generators (Non-Gen) are former hazardous waste generators.

The Subject Property was listed under the following facility names:

**Name:** Fuji Photo Film USA Inc

**Description:** The Subject Property is listed in the Non-Gen (1997, 2006, and 2007) and SQG (1994) databases under the USEPA ID No. NY0000463257 for the generation of undefined waste (D000) and silver (D011). Waste volumes were not specified, with the exception of manifests from 1994 for the disposal of 60 pounds of D011. No violations were listed in association with this facility.

**Name:** Noritsu America – Long Island Marriott

**Description:** This Subject Property is listed in the Facility Index System (FINDS), Non-Gen (2006 and 2007) and SQG (1995) databases under USEPA ID No. NYR000002352 for the generation of D011. Waste volumes were not specified with the exception of manifests from 2016 from the disposal of 456 pounds of mercury (D009). No violations were listed in association with this facility.

Both listings appear to be associated with the disposal of office equipment (i.e., printers, photocopiers, etc). Based on the type and volume of waste generated at the Subject Property and absence of violations, this listing is not considered a REC.

The following adjoining and surrounding properties were listed in the RCRA databases:

**Site Name:** Nassau Coliseum

**Site Address:** 1225 Hempstead Turnpike

**Location:** This facility adjoins the Subject Property to the north and west (hydraulically up and cross gradient)

**Description:** The site is listed in the LQG (2016) databases under the USEPA ID No. NYR000227686 for the generation of lead (D008). Waste volumes were not specified, with the exception for manifests from 2017 for the disposal of 25 pounds of ignitable waste (D001). No violations were listed in association with this facility. Based on the type and volume of waste generated, and absence of violations, this list is not considered a REC.

**Site Name:** Nassau Energy LLC

**Site Address:** 185 Charles Lindberg Boulevard

**Location:** About 570 feet north of the Subject Property (hydraulically up gradient)

**Description:** This site is listed in the CESQG (2014), SQG (2006, 2007), LQG (2001), and non-generator (2006) databases under USEPA ID No. NYR000098582 for the generation of D002 and D009. Universal waste violations were reported in 2007; however, the facility is currently listed as in-compliance. Waste volumes were not specified except for manifests from 1991 for the disposal of 2,772 gallons of halogenated solvents (F002) and manifests from 2018 manifests for the disposal of five pounds of D009 were transported offsite. The site was also identified in the US Aerometric Information Retrieval System (AIRS) Facility Subsystem (AFS) database for active air emission permits. Based on the volume and type of waste generated, proximity and location with respect to the Subject Property, and potential for operations to adversely impact groundwater and soil vapor at the Subject Property, this listing is considered a REC.

#### 4.2 State Agency Database Findings

The Subject Property and/or sites within the respective minimum search distances as specified by ASTM E1527-13 were not listed in the following state agency databases: SWF/LF, NY ENG CONTROLS, NY INST CONTROLS, NY VCP, NY Brownfields, SWRCY, CBS, MOSF, and NY DRYCLEANERS.

---

## SHWS Database

The SHWS records are the states' equivalent to the Superfund Enterprise Management System (SEMS) and may or may not already be listed on the federal SEMS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where potentially responsible parties will pay for cleanup. The Subject Property was not listed in the SHWS database; however, Mitchel Field, which is inclusive of the Subject Property, was listed in the SHWS database as per the EDR Orphans Summary.

The Mitchel Field site was listed as a SHWS on February 21, 2002 with a Class P (potential registry site) classification. The about 1,500-acre site was historically operated for military use dating back to the Revolutionary War. Activities included training and bombardment with munitions. Military and airfield activities ceased in 1961 and the site, including the Subject Property, was sold to Nassau County in the mid-1960s. In 2009, the US Army Corps of Engineers (USACE) completed an assessment of the site for military munitions and concluded that no human or ecological receptors were identified. However, spent shell casings were identified during the development of the sports field southwest of the Subject Property, and the presence of smaller arms rounds (non-explosive) and/or shell casings is possible in the former munition areas of the Subject Property.

According to documents available on the NYSDEC database and the Formerly Used Defense Sites (FUDS) database, an installation restoration program (IRP) was initiated in July 1995 related to aboveground storage tank (AST) and incinerator operations at the site, and an investigation was completed in September 1998. The remedial action has an anticipated completion date of September 2028; however, further information on the remedy was not provided. According to the December 2009 Site Inspection Report for Mitchel Field, prepared for the USACE, the northeastern portion of the Subject Property is within the former Skeet Range (Munitions Response Site [MRS] 2) and the southwestern corner of the Subject Property is within the former Machine Gun Range (MRS 5). As part of the site inspection, eight soil samples were collected within the MRS 2 boundary and seven soil samples were collected within the MRS 5 boundary; however, no samples were collected from the Subject Property. Results detected exceedances of iron above the USEPA Residential Direct Contact Soil Screening Level and lead above the USEPA Interim Ecological Screening Levels. According to the NYSDEC database, an environmental assessment is ongoing. Due to the limited nature of the investigations, the absence of a comprehensive environmental investigation assessing soil, groundwater, and soil vapor impacts from historical airfield operations, and inclusion of the Subject Property, the listing is considered a REC.

Information regarding a Class P site is preliminary in nature and unverified because the NYSDEC's investigation of the site is not yet complete. While no regulatory requirement currently exists for the Subject Property, NYSDEC may require investigation and reporting to determine if the site is eligible for the Superfund. Subsequent investigation, remediation and reporting related to the program may result in additional costs or schedule delays for future development. Therefore, the Class P classification is considered a Business Environmental Risk (BER).

Because of the former site use as a military airbase, the use of per- and polyfluoroalkyl substances (PFAS)-containing aqueous film-forming foams (AFFFs) was evaluated. Military activity at the Subject Property ceased in 1961, two years before the United States Navy and manufacturing company 3M reportedly began development of AFFF. Therefore, it is unlikely that PFAS-containing AFFF foam was used during this historical operation of the Subject Property.

Two Inactive Hazardous Waste Disposal Sites (SHWS) sites were identified within the minimum search area of one mile. One listing is over 4,000 feet from the Subject Property and received a 'No Further Action' Record of Decision from the NYSDEC in 2002; therefore, this listing is not considered a REC. The remaining listing is summarized below:

**Site Name:** Purex-Mitchell Field

**Site Address:** Commercial Field

**Location:** About 5,061 feet northwest of the Subject Property (hydraulically up gradient)

**Description:** The site historically operated as an industrial facility for chemical distribution from 1955 to 1977 and the site was listed as a SHWS on November 18, 1999. Information on the facility indicates that a chlorinated solvent plume in the vicinity of the site is related to former chemical distribution operations. Remediation of the site and associated plume has included contaminant recovery wells, air stripping, and a slurry wall constructed to restrict migration of groundwater contaminants. The results of a 1992 soil sampling program indicated that the soil cleanup objectives outlined in the remedy had been achieved. Groundwater remediation operated by the Nassau County Department of Public Works (DPW) is ongoing. Impacts to soil vapor have not been evaluated. Based on the proximity and hydraulic location of this site with respect to the Subject Property, type and solubility of contaminants of concern, migration of contaminants in groundwater and absence of information regarding impacts to soil vapor, the Purex-Mitchell Field site is considered a REC.

### **Leaking Storage Tanks Database**

The LTANKS database contains an inventory of reported leaking storage tank incidents, including leaking underground storage tanks (UST) and aboveground storage tanks (AST). The minimum

search area for the LTANKS database includes the Subject Property and any sites within a 1/2-mile radius.

The Subject Property is not listed in the LTANKS database; however, 14 sites were identified within the minimum search area. The listed incidents were primarily caused by tank test failures, tank failures, and tank overfills. The 14 incidents have been granted closed status by the NYSDEC, indicating that the NYSDEC is satisfied with spill remediation; therefore, these listings are not considered RECs.

### **Spills Database**

The Spills database, maintained and updated by NYSDEC, is an inventory of sites where spills have been identified and reported to the NYSDEC. One closed spill is listed in association with the Subject Property and is summarized below:

- NYSDEC assigned Spill No. 0001783 to the Subject Property on May 11, 2000 after contamination was encountered during the removal of a 550-gallon underground fuel oil storage tank. Cleanup of the spill was completed and the spill was closed by NYSDEC on October 30, 2000.

The closed spill on the Subject Property is considered a historical REC (HREC).

An additional eight spills were identified in the 1/8-mile search radius. All eight spills have been granted closed status by the NYSDEC, indicating that NYSDEC is satisfied with spill remediation; therefore, these listings are not considered RECs.

### **NY UST and AST Databases**

The UST and AST databases contain records of state and county registered USTs and ASTs. A registered UST or AST does not constitute a REC in and of itself; however, properties listed on the UST or AST databases with a reported leak, spill, or release could constitute a REC with respect to the Subject Property.

The Subject Property was listed in the AST and UST databases (Nassau County Fire Marshall [NCFM] active Facility ID 24811). The Subject Property is listed as housing an in-service AST installed on May 19, 2001, and one removed UST of unknown volume installed on December 17, 1982 and removed on an unknown date. Additional information on the tanks was not available. According to the Mr. Zach Tsibleman, Director of Engineering for the Subject Property, a 550-gallon, UST was removed and replaced with a 500-gallon AST to supply the emergency generator with diesel; however, Langan could not confirm if these are the tanks are associated with the

AST and UST databases. The absence of closure documentation and location information associated with the former UST is considered a REC.

The following adjoining and surrounding properties were listed in the UST and AST databases and are summarized below:

**Site Name:** Nassau Coliseum

**Site Address:** 1225 Hempstead Turnpike

**Location:** Adjoins the Subject Property to the north and west (hydraulically up and cross gradient)

**Description:** The site is identified as an active UST facility (NCFM Facility ID 17210) housing one closed/removed UST installed on September 1, 1987; capacity, contents construction details and removal date were not specified. Based on the absence of spills and/or violations associated with this listing, it is not considered a REC.

**Site Name:** REXCORP Plaza Tank Registration

**Site Address:** 340 Rexcorp Plaza

**Location:** Adjoins the Subject Property to the south (hydraulically down gradient)

**Description:** The site is identified as an active UST facility (NCFM UST Facility 14092) housing one in-service UST was installed on March 1, 1984. Capacity, contents, and construction details were not specified. Based on the absence of spills and/or violations, and location hydraulically down gradient from the Subject Property, this listing is not considered a REC.

**Site Name:** Suez Energy Generation

**Site Address:** 185 Charles Lindbergh Boulevard

**Location:** About 570 feet north of the Subject Property (hydraulically up gradient)

**Description:** The site is identified as an active CBS facility (CBS No. 1-000384) and unregistered NYSDEC PBS facility (PBS No. 1-000309). The PBS listing is for one 6,000-gallon waste oil AST and one 500-gallon waste oil AST. Status and construction details for the ASTs were not provided.

**Site Name:** NC Central Util PL – Trigen Nassau Energy

**Site Address:** 185 Charles Lindbergh Boulevard

**Location:** About 570 feet north of the Subject Property (hydraulically up gradient).

**Description:** The site is identified as an inactive UST facility and active AST facility (NCFM No. 36205) housing one active AST was installed on February 1, 1991 and nine active ASTs installed on September 22, 2000. Two closed/removed USTs installed on

November 1, 1976; the date of UST removal was not specified. Capacity, contents, construction details for the USTs and ASTs were not provided.

**Site Name:** Trigen Cogeneration Plant

**Site Address:** 185 Charles Lindbergh Boulevard

**Location:** About 570 feet north of the Subject Property (hydraulically up gradient)

**Description:** The site is identified as an active Nassau County UST and AST facility (Facility No. 056083) housing one in-service waste UST of unknown volume installed in June 1991, one 6,000-gallon waste oil AST, one 500-gallon waste oil AST, one 75-gallon phosphates AST, one 75-gallon morpoline AST, one 5,000-gallon caustics AST, one 5,000-gallon acids AST, one 40-gallon diethylamino ethanol AST, and one 75-gallon caustics AST; installation dates of the ASTs were not specified. Construction details for the USTs and ASTs were not provided. Multiple spills are listed in association with this site; however, all spills have been administratively closed by the NYSDEC.

Due to the proximity and hydraulic location with respect to the Subject Property, unreported releases or spills of petroleum products, solvents or other hazardous products used at the northern, upgradient energy plant may have adversely impacted groundwater and/or soil vapor at the Subject Property. Therefore, the three listings associated with this facility address are considered RECs.

### **4.3 Other Database Findings**

#### **UXO Database**

An Unexploded Ordinance (UXO) is a military munition that has been prepared for action and remains unexploded. As previously discussed, the Subject Property is located within the former Mitchel Field Air Force Base. Areas of concern included the northeastern portion of the Subject Property, within the former MRS 2, and the southwestern corner of the Subject Property, within the former MRS 5. According to the 2009 USACE report, explosive risk for these areas is low to nonexistent. The report indicated that spent shell casings were identified during the development of the sports field southwest, and the presence of smaller arms rounds (non-explosive) and/or shell casings is likely in areas of the Subject Property. Elevated concentrations of metals, including lead and iron, were identified in soil samples collected from areas of MRS 2 and MRS 5 outside of the Subject Property boundary. The potential presence of UXO or fill containing elevated levels of metals as the result of historical military activity may result in premium costs for handling and disposal during construction and is considered a BER.

---

## **FUDS Database**

The Formerly Used Defense Sites (FUDS) database contains a listing of properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions. As previously discussed, the Subject Property is located within the former Mitchel Field Air Force Base that is listed in the FUDS database. Due to the limited nature of the investigations at the site, the absence of a comprehensive environmental investigation assessing soil, groundwater, and soil vapor impacts from historical airfield operations, and inclusion of the Subject Property, the listing is considered a REC. The potential presence of UXO or fill containing elevated levels of metals as the result of historical military activity may result in premium costs for handling and disposal during construction and is considered a BER.

## **4.4 Local Regulatory Agency Findings**

### **FOIA Requests**

Freedom of Information Act (FOIA) requests were submitted on October 19, 2022 to the following federal, state, and local agencies via written correspondence:

- USEPA, Region 2;
- NYSDEC, Region 1;
- New York State Department of Health (NYSDOH);
- Nassau County Health Department;
- Nassau County Fire Commission – Hazardous Materials Division Department; and
- Town of Hempstead Clerk.

As of the date of this report, complete responses have not yet been received. Should future responses alter the conclusions of this Phase I ESA, an addendum will be issued. Copies of the FOIA requests and any responses received are included in Appendix D.

### **USEPA**

Langan performed a search of the USEPA MyEnvironment, MyPropertyInfo, and Enforcement and Compliance History Online (ECHO) databases on October 25, 2022. As discussed in Section 4.1, the Subject Property was identified in the RCRA federal databases. Copies of the database information is included in Appendix C.

### **Town of Hempstead**

Langan received a response from the Town of Hempstead on October 26, 2022 indicating that there were no records available for the Subject Property.

---

## Zoning Department

According to the Nassau County Land Records the Subject Property is on commercial land with property class codes of 414.14 (hotel) and 410.84 (living accommodations). According to the Town of Hempstead Zoning Map #24 and #36 for East Hempstead, the Subject Property is located within a the Mitchel Field Mixed Use District (MFM). Copies of the Nassau County Land Records are included in Appendix E, and copies of the Town of Hempstead Zoning Maps are included in Appendix F.

### 4.5 Physical Setting Sources

#### 4.5.1 Topography

According to the USGS Freeport Quadrangle 7.5-minute Series Topographic Map, the elevation of the Subject Property is about 78 feet above mean sea level (msl). The general topographic gradient of the surrounding area slopes south-southeast towards East Meadow Brook. Langan observed the topography at the Subject Property to be generally flat.

#### 4.5.2 Geology

According to the United States Geologic Survey interactive map (<https://mrdata.usgs.gov/geology/state/map-us.html>), the Site is located within the Matawan Group, Monmouth Group and Magothy Formation, which consists of coastal deposits composed of coarse-detrital gravel and sands to fine-detrital glauconitic sandy clays deposited during the Upper Cretaceous. Geological surface features (e.g., rock outcroppings) were not observed on the Subject Property.

#### 4.5.3 Hydrology

Groundwater flow is typically topographically influenced, as shallow groundwater tends to originate in areas of topographic highs and flows toward areas of topographic lows, such as rivers, stream valleys, ponds, and wetlands. A broader, interconnected hydrogeologic network often governs groundwater flow at depth or in the bedrock aquifer. Groundwater depth and flow direction are also subject to hydrogeologic and anthropogenic variables such as precipitation, evaporation, extent of vegetation cover, and coverage by impervious surfaces. Other factors influencing groundwater include depth to bedrock, the presence of artificial fill, and variability in local geology and groundwater sources or sinks.

According to the USGS Long Island Depth to Water Viewer (<https://ny.water.usgs.gov/maps/li-dtw/>), groundwater is estimated at about 30 feet below ground surface (bgs). The closest surface water body appears to be the East Meadow Brook, located approximately 1,850 feet south-

southeast of the Subject Property. Based on the local topography and proximity to nearby surface water features, the inferred groundwater flow direction at the Subject Property is to the south-southeast towards East Meadow Brook.

According to Nassau County's online GIS viewer and the Federal Emergency Management Agency (FEMA) Flood Map 36059C0227G (effective 9/11/2009), the Subject Property is located within Zone X (areas determined to be outside the 0.2% annual chance floodplain). According to the NYSDEC Environmental Resource Mapper (<http://www.dec.ny.gov/gis/erm/>), there are no mapped wetlands at the Subject Property. The closest mapped wetland is approximately 750 feet to the east of the Subject Property and consists of a state regulated wetland check zone for the East Meadow Brook.

#### **4.6 Historical Use Information**

Langan reviewed available historical resources (including aerial photographs, topographic maps, and city directories) dated 1890 to 2017. Findings of the review are presented below.

##### **4.6.1 Aerial Photographs**

Langan reviewed aerial photographs of the Subject Property and surrounding areas for the years 1938, 1947, 1951, 1953, 1962, 1966, 1976, 1980, 1985, 1994, 2006, 2009, 2013, and 2017.

The 1938 aerial photograph shows sparse residential properties on the Subject Property, gridded streets south of the Subject Property along Hempstead Turnpike, and a single, partially completed, runway for an airfield located west of the Subject Property. By 1947, the residential properties are no longer present and the airfield covers the majority of the Subject Property and the adjoining properties to the north, east and west. The Subject Property remains relatively unchanged until the 1976 photograph, when the airfield is replaced with a stadium located west of the Subject Property, surrounded by parking lots, including the Subject Property, and landscaped areas. The main building comprised of a one-story podium with two 10-story towers is visible on the northern part of the Subject Property beginning in 1985, and the annexed 11-story tower is visible beginning in 1994. The Subject Property remains unchanged through 2017. The surrounding area is fully developed with residential, commercial and institutional properties by 1994. The historical use of the Subject Property as an airfield is considered a REC. Copies of aerial photographs are included in Appendix G.

##### **4.6.2 Historical USGS Topographic Quadrangles**

Langan reviewed historical USGS Topographic Quadrangle maps obtained from EDR for information regarding past uses of the Subject Property. Quadrangle maps were available for the

Subject Property for the years 1897, 1898, 1899, 1903, 1947, 1955, 1969, 1979, 1994, 2013, 2016 and 2019.

On the 1897 through 1903 maps, the Subject Property appears relatively undeveloped, aside from an unpaved road that bisects the property in the northwest corner. East Meadow Brook is mapped to the east of the Subject Property. By 1947, Mitchel Field airport (identified as Mitchel Air Force Base in 1955) has been constructed on the Subject Property and on the adjoining properties to the north, west, and east. The 1969 map indicates that the airfield has been abandoned and by 1979, and the airfield is subsequently replaced with a stadium located west of the Subject Property. In the 1994 map, the present-day building is visible on the northern part of the Subject Property. The historical use of the Subject Property and the adjoining properties as an airfield is considered a REC. Copies of the topographic maps are included in Appendix H.

#### **4.6.3 City Directories**

The City Directory Abstract, obtained from EDR, is a review of available business directories, including city, cross-reference, and telephone directories, at approximately five-year intervals for the years spanning 1972 through 2017. The directory was obtained for the Subject Property and surrounding area. A copy of the City Directory Abstract report is included in Appendix I.

The Subject Property and adjoining properties were listed in the directory under various commercial businesses. Surrounding properties included various commercial and residential properties. Operations denoted in the City Directory are not considered RECs.

#### **4.6.4 Environmental Lien Search**

Langan contracted EDR to conduct an environmental lien search for the Subject Property. The result of the search, which included a compilation of available data and verification of the findings with the appropriate regulatory authorities, revealed that there are no environmental liens or other Activity and Use Limitations (AUL) associated with the Subject Property. A copy of the Environmental Lien Search is included in Appendix J.

## **5.0 SITE RECONNAISSANCE**

The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Subject Property and progressing to the adjoining and surrounding properties. The assessment of the adjoining and surrounding properties was limited to identifying, if possible, any indications of past or current use that may involve the use, storage, disposal, or generation of hazardous substances or petroleum products; noting the general type of current use; the general topography of the surrounding area; and providing a general description of adjoining and surrounding structures.

Kaitlyn Gioia of Langan performed the site reconnaissance on October 18, 2022. Mr. Zach Tsibleman, the Director of Engineering for the Long Island Marriott, accompanied Ms. Gioia during the site reconnaissance. The weather at the time of the inspection was overcast and approximately 50 degrees Fahrenheit (°F).

### **5.1 General Site Setting and Reconnaissance Observations**

The Subject Property, which spans three tax lots, has a total area of about 14.6 acres and is developed with a hotel comprised of a one-story podium with two 10-story towers and an attached 11-story tower, surrounded by asphalt-paved parking lots and landscaped areas. The Long Island Marriott operates the Subject Property. Langan identified de minimis staining, likely associated with vehicle parking, throughout the parking lots of the Subject Property.

The 11-story hotel includes a full cellar level underlying the building podium. Landscaped gardens are present in the eastern part of the Subject Property. Open-air parking is present on all sides of the hotel building. The main entrance to the building is present on the eastern side of the Subject Property, fronting James Doolittle Boulevard. Additional entrances are located on the western side of the building, facing Nassau Coliseum, and the south side of the building, adjacent to the loading dock and ballroom of the Subject Property.

The cellar contains maintenance closets, a workshop, offices, a telephone/communications room, mechanical rooms, a laundry room, locker rooms, an employee cafeteria, a sump pump/pool maintenance room, an indoor-poolroom, a gym, and a salon. Maintenance rooms, storage rooms, offices, bathrooms, a business center, a kitchen, a banquet hall, a restaurant, and the hotel lobby occupy the first floor. The second through eleventh floors of each tower consist of hotel rooms, lounges, storage areas, and electrical rooms. A third floor step-out contains HVAC equipment and nine air handlers. The roof of the Subject Property contains elevator mechanical rooms, cellular service equipment, and HVAC equipment. An emergency generator and a 500-gallon diesel aboveground storage tank situated in secondary containment is present along the western exterior wall of the building.

The building contains one hydraulic elevator that services the cellar through the third floor. The remaining seven elevators that service the hotel towers are electric-powered. The hydraulic elevator has an associated hydraulic reservoir located in a designated room next to the elevator pit in the cellar level.

## **5.2 Pits, Ponds, Lagoons**

Pits, ponds, or lagoons were not observed.

## **5.3 Pools of Liquid**

Pools of liquid were not observed.

## **5.4 Storm Drains, Wells, and Cisterns**

Storm drains were observed throughout the parking lots. According to Mr. Tsibleman, all storm drains connect to the Nassau County combined sewer system. Floor drains observed in the cellar level poolroom and first floor kitchen also reportedly connect to the Nassau County combined sewer system.

## **5.5 Transformers and Other Suspect Equipment**

Langan observed one hydraulic reservoir in the cellar of the hotel, located next to the elevator pit. The concrete slab within the reservoir room appeared to be in good condition; staining or evidence indicative of a release was not observed.

Two hydraulic compactors with external hydraulic reservoirs were observed in the ground-level loading dock area. De minimis staining was observed on the concrete adjacent to the compactors; the concrete appeared to be in good condition and observed staining did not extend in or around floor drains or floor cracks.

## **5.6 Storage Containers, Drums, and Chemical Storage Areas**

Langan observed various sized containers of the following chemicals in the cellar level workshop, mechanical rooms, maintenance rooms, and laundry room:

---

all-purpose cleaner	concrete bonder	motor oil
indoor-outdoor adhesive	muriatic acid	all-purpose sealer
WD-40	furniture polish	weber oil
wallpaper adhesive	grout	bleach
primer, paint	pool plaster patch	elevator gear oil
epoxy	caulk	disinfectant
calcium hypochlorite	quikrete	degreaser
spray paint	joint compound	dechlor reducing agent
laundry detergent	glass cleaner	grease-release cleaner
pH balancer	paint thinner	

Langan did not observe evidence of spills or releases beneath storage containers. The slab in these areas appeared to be in good condition and no staining was observed in or around floor drains.

### **5.7 Sewage Ejector Pits and Sumps**

A sump with a sump pump, was observed in the pool maintenance/filtration area in the western part of the cellar. According to Mr. Tsibleman, the sump pit connects to the Nassau County combined sewer system.

### **5.8 Waste Generation, Storage, and Disposal**

Trash containers were observed throughout the Subject Property and two garbage compactors are located in the ground-level loading dock area. According to Mr. Tsibleman, Winter Bros. Waste Systems, a private waste disposal contractor, remove trash regularly.

An about 55-gallon waste grease/food-oil container was noted in the loading dock area. De minimis staining was observed on the concrete adjacent to the container; the concrete appeared to be in good condition and observed staining did not extend in or around floor drains or floor cracks.

## **5.9 Air Emissions or Wastewater Discharges**

Air emissions and wastewater discharges were not observed.

## **5.10 USTs or ASTs**

One 500-gallon diesel fuel oil AST was observed adjacent to the emergency generator located on the western exterior wall of the hotel ballroom. The 500-gallon AST is elevated on saddles and within a secondary containment structure. Evidence of corrosion or staining was not observed on the AST or underlying concrete slab.

According to Mr. Tsibleman, a former 550-gallon UST was removed during building renovation. He was not aware of the location of the former UST.

## **5.11 Monitoring Wells or Remedial Activities**

Monitoring wells and evidence of remedial activities were not observed.

## **5.12 Stained or Discolored Soil**

No staining or discolored soil was observed.

## **5.13 Leachate or Seeps**

Evidence of leachate or seeps was not observed.

## **5.14 Adjoining and Surrounding Property Uses**

The Subject Property is bound by parking associated with the western-adjoining Nassau Veterans Memorial Coliseum to the north, James Doolittle Boulevard followed by the Francis T. Purcell Preserve to the east, Hempstead Turnpike following by RXR Plaza to the south, and Nassau Veterans Memorial Coliseum to the west.

## **6.0 INTERVIEWS**

### **6.1 Site Owner**

The Subject Property Owner was not interviewed as part of this Phase I ESA.

### **6.2 Site Occupants**

Mr. Zach Tsibleman, the Director of Engineering for the Long Island Marriott, provided Langan with access to the Subject Property. He has been associated with the Subject Property for about three months, and was not aware of any past uses, previous environmental investigations, spill incidents, hazardous waste generation, or other environmental concerns at the Subject Property.

### **6.3 Owners/Tenants of Adjoining Properties**

Owners/tenants of adjoining properties were not interviewed as part of this Phase I ESA.

## **7.0 ADDITIONAL SERVICES**

### **7.1 Radon**

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithological conditions.

According to the USEPA Radon Zone Map, the Subject Property is in Zone 3, where there is a predicted average indoor radon screening level less than 2 picoCuries per liter (pCi/L). The USEPA maintains a recommended radon action level of 4.0 pCi/L for residences. According to the EDR Report, 226 radon tests have been conducted in Nassau County with results indicating that 98% of living areas and 98% of basements have radon concentrations less than 4 pCi/L, which is the USEPA action level for mitigation. The NYSDOH Radon Test Results by Town indicates that 350 tests have been carried out in homes in Hempstead, with an average radon concentration of 1.19 pCi/L. Based on this data, elevated levels of radon gas at the Subject Property are not expected.

### **7.2 ACM, LBP, Mercury, and PCBs**

A preliminary hazardous building materials survey was conducted on October 18 and November 14 and 15, 2022 to identify the presence/absence of asbestos-containing material (ACM), lead-based paint (LBP), and/or PCB-containing material. ACM was identified in the building surveyed areas. Identified ACM must be removed by a certified asbestos abatement contractor in accordance with applicable federal, state, and local regulations prior to being disturbed, including maintenance, renovation, or demolition activities. Generally, sampled building materials did not contain detectable concentrations of lead and PCBs above applicable standards. .

## **8.0 DEVIATIONS AND DATA GAPS**

### **8.1 Deviations**

Langan performed a Phase I ESA of the Subject Property using a standard of good commercial and customary practice that is consistent with the ASTM E1527-13 and the 40 CFR Part 312 Standards and Practices for AAI. Significant deviations were not made to the above referenced standards.

### **8.2 Data Gaps**

In order to address data gaps, additional sources of information may be consulted. According to AAI, Section 312.20 (g), "to the extent there are data gaps (as defined in section 312.10) in the information developed...that affect the ability of persons (including the environmental professional) conducting the all appropriate inquiries to identify conditions indicative of releases or threatened releases...such persons should identify such data gaps, identify the sources of information consulted to address such data gaps, and comment upon the significance of such data gaps." According to ASTM E1527-13, Section 8.3.2.3, "historical research is complete when either: (1) the objectives in 8.3.1 through 8.3.2.2 are achieved; or (2) data failure is encountered. Data failure occurs when all standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. If data failure is encountered, the report shall document the failure, and if any of the standard historical sources were excluded, give the reasons for the exclusion."

This Phase I was completed without significant data gaps except that responses to FOIA letters have not been received from all recipients. Sufficient information was provided from other sources to enable conclusions regarding RECs at the Subject Property. As such, these data gaps are not expected to alter the results of the Phase I ESA. If information becomes available that alters the conclusions of this report, an addendum will be issued.

## **9.0 FINDINGS, OPINIONS, AND CONCLUSIONS**

This Phase I ESA was conducted in accordance with ASTM E1527-13 and the USEPA AAI Rule. The objective of this Phase I ESA was to identify the presence or likely presence, use, or release on the Subject Property of hazardous substances or petroleum products as defined in ASTM E1527-13 as a REC.

Based on information obtained during the visual inspection of the Subject Property; review of environmental databases and historic information; and contact with federal, state, and local agencies, the following RECs and HRECs were identified.

### **REC 1: Historical Use of the Subject Property**

The Subject Property and several adjoining and surrounding properties were occupied by Mitchel Air Force Base from the 1910s through the mid-1960s. Use prior to 1910 also included military facilities dating back to the revolutionary war. According to a December 2009 Site Inspection Report for Mitchel Field, prepared for the United States Army Corps of Engineers (USACE), the northeastern portion of the Subject Property is within the former Skeet Range (MRS 2) and the southwestern corner of the Subject Property is within the former Machine Gun Range (MRS 5). Soil samples collected during a 2009 investigation by the USACE found iron above the USEPA Residential Direct Contact Soil Screening Level and lead above the USEPA Interim Ecological Screening Levels; however, no samples were collected from the Subject Property. The most recent publically available information indicates that NYSDEC classifies the site as a "Class P" SHWS site, but NYSDEC has yet to complete an overall environmental assessment of the former airfield.

Undocumented spills or releases of solvents, chemicals, and/or other hazardous substances associated with this historical use may have adversely affected soil, groundwater, and/or soil vapor on the Subject Property.

### **REC-2: Historical Petroleum Bulk Storage at the Subject Property**

According to Nassau County Fire Marshal records, a UST of unknown size was installed on December 17, 1982 on the Subject Property. The UST is listed as removed; however, UST closure documentation was not provided. The absence of UST location information and closure documents is considered a REC.

### **REC-3: Current and Historical Use of the Adjoining and Surrounding Properties**

Nassau Energy Corporation, located about 570 feet north of the Subject Property (hydraulically up gradient), has operated as a power plant facility since the 1960s. The Nassau Energy Corp. is

also identified under the facility names Suez Energy Generation, Trigen Nassau Energy, and Trigen Cogeneration Plant. The facility is listed in the RCRA generator databases for generation of corrosive-, silver- and halogenated-hazardous wastes and houses multiple ASTs containing of solvents, acids and waste oil. Undocumented spills or releases of solvents, chemicals, or other hazardous substances associated with these current operations may have adversely affected groundwater, and/or soil vapor on the Subject Property.

The Purex-Mitchell Field site, located about 5,061 feet northwest of the Subject Property (hydraulically up gradient), operated as an industrial facility for chemical distribution from 1955 to 1977. Information on the facility indicates that a chlorinated solvent plume near the site is related to former chemical distribution operations. Remediation to date has included contaminant recovery wells, air stripping, and a slurry wall constructed to restrict migration of groundwater contaminants. The results of a 1992 soil investigation indicated the soil clean-up objectives had been met; however, groundwater remediation is ongoing and soil vapor has not been evaluated. Based on proximity, contaminant extents and solubility, migration of contaminants in groundwater, and absence of information regarding impacts to soil vapor, this historical operation may have adversely affected groundwater, and/or soil vapor on the Subject Property.

#### **REC-4: Known Area-Wide Groundwater Contamination**

The Old Roosevelt Field Contaminated Groundwater Area (USEPA ID No. NYSFN0204234) and New Cassel/Hicksville Groundwater Contamination (USEPA ID No. NY0001095363), are two NPL sites located over 4,000 feet north and upgradient of the Subject Property. Operations at the two sites include aviation activities from (1911 to 1955) and various industrial operations (time unknown), respectively. Both sites are considered to have contributed to a chlorinated solvent groundwater plume that has impacted public supply wells in the area of the Subject Property. Contaminants of concern include carbon tetrachloride, 1,1-DCE, PCE, and TCE. The exact source of the contamination is unknown, and as per the database entry, the USEPA is considering various alternatives for remediation. Documented chlorinated solvent impacts to groundwater in the vicinity of the Subject Property is considered a REC.

#### **Historical Recognized Environmental Conditions**

An HREC is a REC resulting from a past release of hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meets unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

---

## **HREC-1: Historic Spills on the Subject Property**

One closed spill is associated with the Subject Property, and is identified as a HREC:

- NYSDEC assigned Spill No. 00-01783 to the Subject Property on May 11, 2000 after contamination was encountered during the removal of a 550-gallon underground fuel oil storage tank. Cleanup of the spill was completed and NYSDEC closed the spill on October 30, 2000.

## **Business Environmental Risks**

A BER is defined by ASTM 1527-13 as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

The following BERs were identified:

### **BER 1 – NYSDEC SHWS “Class P” Classification**

The former Mitchel Field military airbase, which is inclusive of the Subject Property, is listed in the SHWS database, which is the New York State Superfund. The listing has a Class P (potential registry site) classification, indicating that there is a potential for concern about site contamination. Information regarding a Class P site is preliminary in nature and unverified because the NYSDEC's investigation of the site is not yet complete. While no regulatory requirement currently exists for the Subject Property, NYSDEC may eventually require investigation, remediation and reporting. Subsequent investigation and reporting related to the program may result in additional costs or schedule delays for future development.

### **BER 2 – Possible Military Munitions**

The 2009 USACE investigation of the former Mitchel airfield also addressed potential munitions, including UXO. Areas of concern identified included the northeastern portion of the Subject Property, located within former MRS 2, and the southwestern corner of the Subject Property, located within former MRS 5. According to the 2009 USACE report, the explosive risk for these areas is low. The report indicated that spent shell casings were identified during the development of the sports field southwest of the Subject Property, and the presence of smaller arms rounds (non-explosive) and/or shell casings is likely in the former munition areas of the Subject Property. The presence of munitions may result in premium costs for identification/delineation, handling and disposal during construction.

## **Non-Scope Considerations**

A Non-Scope Consideration is identified by ASTM E1527-13 as an environmental issue or condition at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM E1527-13.

The following non-scope consideration was identified:

A preliminary hazardous building materials survey was conducted on October 18 and November 14 and 15, 2022 to identify the presence/absence of ACM, LBP, and/or PCB-containing material. ACM was identified in the building surveyed areas. Identified ACM must be removed by a certified asbestos abatement contractor in accordance with applicable federal, state, and local regulations prior to being disturbed, including maintenance, renovation, or demolition activities. Generally, sampled building materials did not contain detectable concentrations of lead and PCBs above applicable standards.

## 11.0 STATEMENT OF QUALIFICATIONS AND SIGNATURES

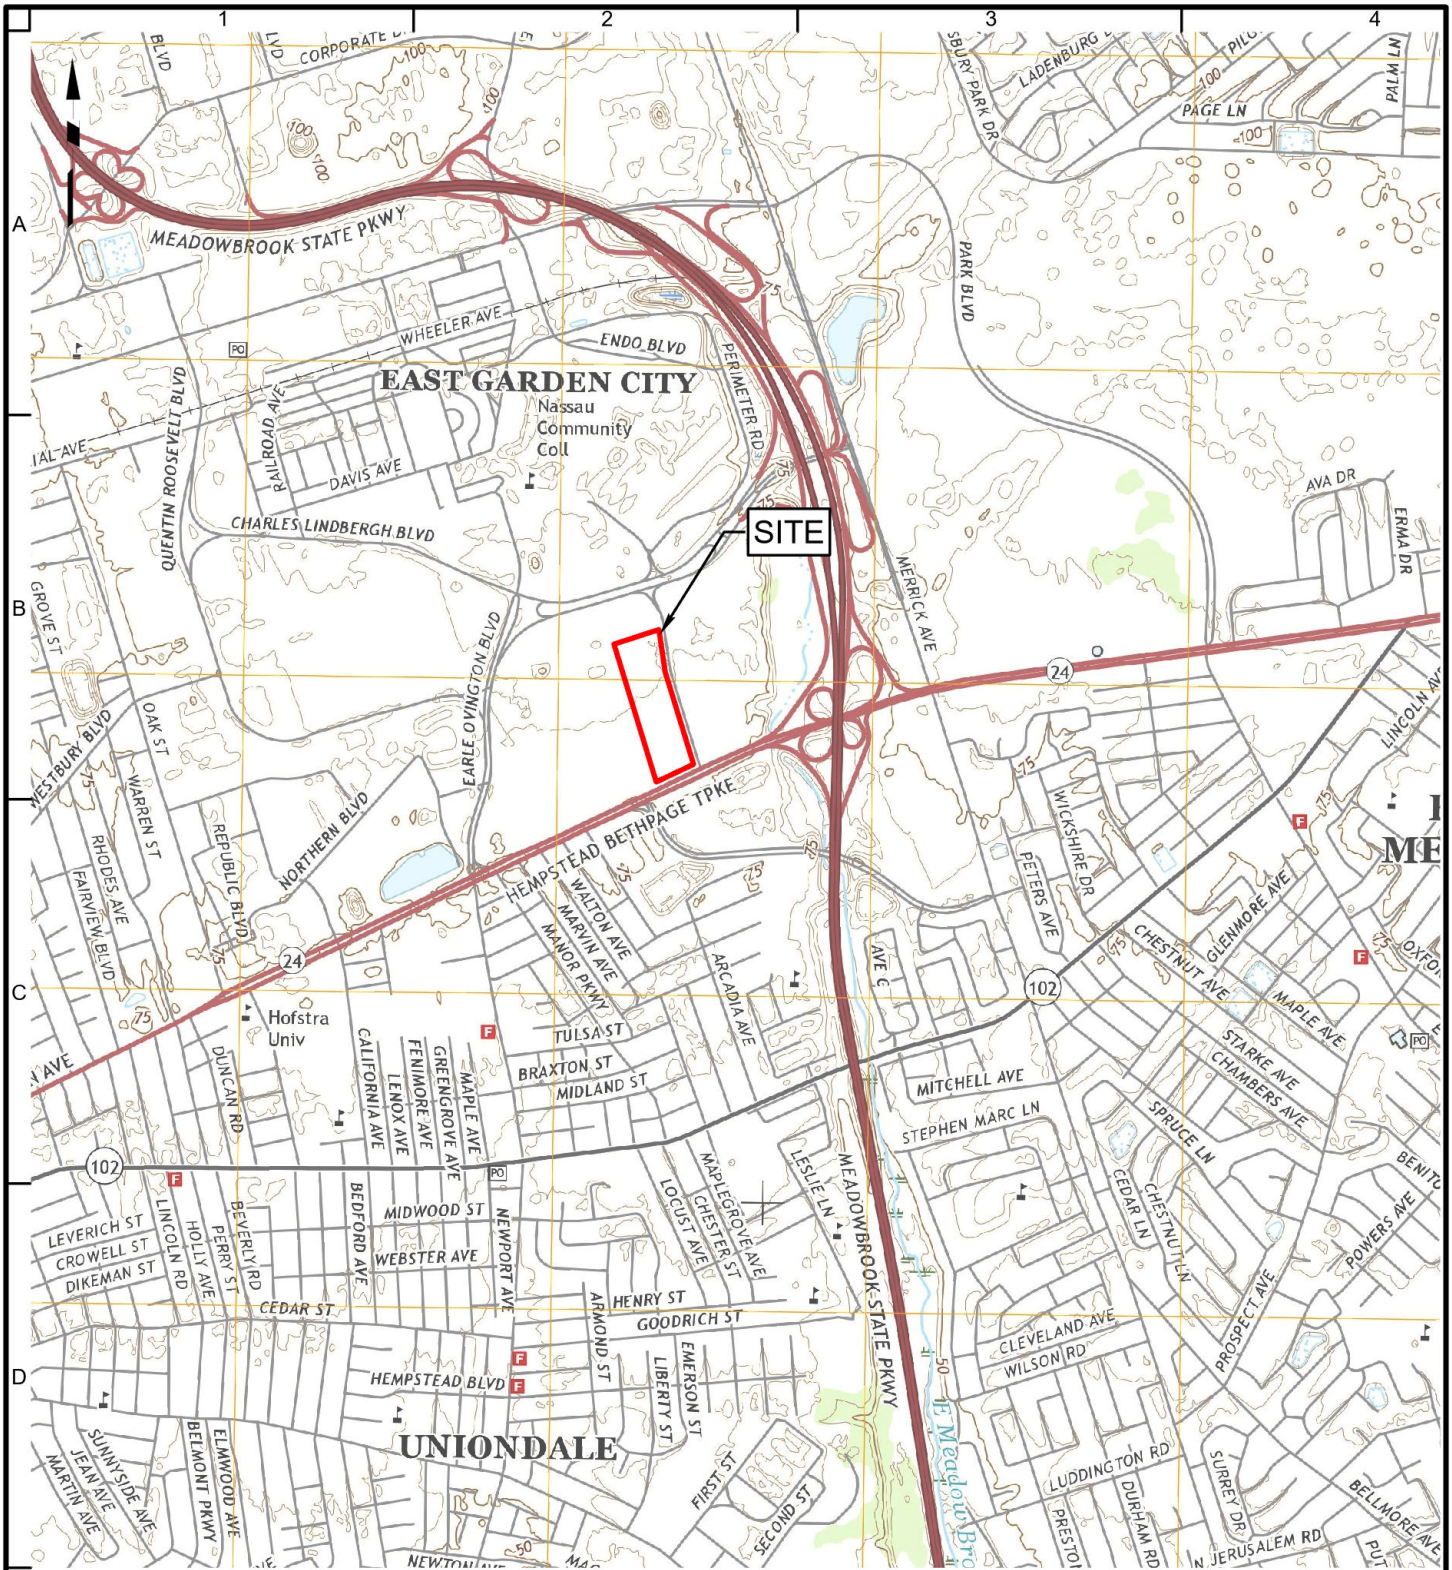

Langan declares that, to the best of its professional knowledge and belief, the personnel who performed this Phase I ESA meet the definition of Environmental Professional as defined in Subsection 312-10 of 40 CFR Part 312 and that they have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. They have developed and performed the AAls in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes outlining the qualifications of the Environmental Professionals who performed this Phase I ESA are included in Appendix K.

## **APPENDIX B**

### **User/Client Questionnaire**

## ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to  
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

---

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The User is defined as the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. These inquiries must also be conducted by the EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

---

### **General Information**

**User/Client Name (s):** Las Vegas Sands Corp/LVS NY Holdco, LLC

**Property Name:** Long Island Marriott

**Address:** 101 James Doolittle Blvd, Uniondale, NY 11553

**Property Type:** Hotel

### **Type of Property Transaction:**

- Purchase of property
- Financing of property
- Sale of property
- Ground Lease
- Build to Suit Lease
- Other Purchase of Ground Lease and other related assets

**Reason Why Phase I ESA is required:** Due Diligence

**Site Contact (s):** Marc Gross

### **Required Information**

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

# LANGAN

**(1.) Environmental liens that are filed or recorded against the property (40 CFR 312.25).**

Did a search of recorded land title records (or judicial records, where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Yes  No

Note 1 – In certain jurisdictions, federal, tribal, state or local statutes or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

**(2.) Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)).**

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Yes  No

**(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes  No

See additional information

**(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**

- (a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Part 5.]
- (b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes  No   
Yes  No

**(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- (a.) Do you know the past uses of the property?
- (b.) Do you know of specific chemicals that are present or once were present at the property?
- (c.) Do you know of spills or other chemical releases that have taken place at the property?
- (d.) Do you know of any environmental cleanups that have taken place at the property?

Yes  No   
Yes  No   
Yes  No   
Yes  No

See additional information

**(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Yes  No

# LANGAN

## Additional Information

Please provide any additional information that you feel is pertinent to the investigation:

Regarding item #3: While we operate hotels we do not have specialized knowledge of Marriott operations or New York (or Long Island)-based hotel operations

Regarding item #5: Any documents regarding site history were provided to Langan and are included in this Phase I ESA.

We make no representations about the level of diligence conducted on the property. Additionally, all of the answers in this questionnaire are qualified by our knowledge, which is limited to any diligence conducted on the property as described in the foregoing sentence.

It is understood that the information presented in this form is an integral part of the Phase I ESA process and that Langan will evaluate and rely on this information in the development of the final Phase I ESA report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal NPL (Superfund) sites***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/26/2022 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

## EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

NASSAU COLISEUM EPA ID:: NYR000227686	1255 HEMPSTEAD TNPK	SSW 1/8 - 1/4 (0.128 mi.)	B8	46

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

### ***Lists of state- and tribal hazardous waste facilities***

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/09/2022 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### ***Lists of state and tribal leaking storage tanks***

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/09/2022 has revealed that there are 14 NY LTANKS sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

Location Id: 1212800

NY TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the NY TANKS list, as provided by EDR, has revealed that there is 1 NY TANKS site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

NY DEL SHWS: A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

A review of the NY DEL SHWS list, as provided by EDR, and dated 05/09/2022 has revealed that there is 1 NY DEL SHWS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
425 MERRICK AVENUE Site Code Id: 130061		NNW 1/2 - 1 (0.830 mi.)	40	226

#### **Records of Emergency Release Reports**

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/09/2022 has revealed that there are 2 NY Spills sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

Site ID: 91629  
Spill Date: 1990-05-11

### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>LIPA T&amp;D SYSTEM</b> EPA ID:: NYR000065870	<b>333 EARLE OVINGTON B</b>	<b>WNW 1/8 - 1/4 (0.225 mi.)</b>	<b>E18</b>	<b>64</b>

**Summary Details:**

Conditions at Proposal February 4, 2000): The Environmental Protection Agency is proposing the Old Roosevelt Field Contaminated Ground Water Area (ORCA) site to the National Priorities List in order to ensure the safety of an operating public drinking water supply located in an area of ground water contamination. The ORCA site, located in Garden City, Nassau County, New York is a contaminated ground water plume. Currently, the plume is documented by the presence of concentrations of carbon tetrachloride; 1,1-dichloroethene (1,1-DCE); tetrachloroethene (PCE); and trichloroethene (TCE) above health benchmarks in Garden City public supply wells 10 and 11. Historically, the

**OLD ROOSEVELT FIELD CONTAMINATED GW AREA (Continued)**

**1001814341**

highest levels of TCE were detected in cooling-water well N8050, formerly located approximately 2,000 feet north-northeast of the Garden City wells. Garden City wells 10 and 11 and the former cooling-water well N8050 are all located on the property that historically was Roosevelt Field. There are several potential sources of the ground water contamination, however, there is not adequate information to attribute it to a specific source or sources. The ORCA site is located on the eastern side of Clinton Road approximately 0.6 mile south of the intersection with Old Country Road. That intersection was the northwest corner of Roosevelt Field and its predecessors, which were used for aviation activities from 1911 until May 1951. The original airfield, known as the Hempstead Plains Aerodrome, encompassed 900 to 1,000 acres east of Clinton Road and south of Old Country Road. The U.S. military began using the Hempstead Plains field before the U.S. entered World War I. When the U.S. entered the war in April 1917, the airfield was taken over as a training center for military pilots and renamed Hawthorne Field. On September 24, 1918, the Army changed the name of the airfield to Roosevelt Field. After the war, the U.S. Air Service authorized some companies to operate from Roosevelt Field but maintained control until July 1, 1920, at which time the Government sold its buildings and improvements and relinquished control of the field. Subsequently, the property owners sold portions along the southern edge of the field and split the remainder of the property into two separate fields, Roosevelt Field on the eastern half, and Curtiss Field. Both fields were bought in 1929 by Roosevelt Field, Inc. and the consolidated property was once again renamed Roosevelt Field. The eastern field was sold in 1936 and became a racetrack, while the western field located at the corner of Clinton and Old Country Roads continued to operate as an aviation center. Roosevelt Field was used by the Navy and Army during World War II. After the war, Roosevelt Field reverted to a commercial airport until it closed in May 1951. Building construction at the site began in 1956. The Roosevelt Field Shopping Mall and Garden City Plaza currently occupy what was once Roosevelt Field. Besides the aviation activities that occurred at Roosevelt Field, there are several other potential sources of solvent contamination in the site vicinity. There are several industrial sites to the north that were significant users of chlorinated solvents in the past. One of those sites discharged effluent with TCE as high as 10,000 parts per billion (ppb) to sewer pipes that were found to be leaking in 1978 and again in 1986. To the southeast, there are sites where two former solvent distributors were located. Based on the presence of so many potential sources in close proximity to the Garden City wells, the well contamination cannot be directly attributed to a specific source or sources at this time. Garden City public supply wells 10 and 11 were installed at what had been the southwestern corner of the airfield in 1952 and put into use in 1953. The wells have shown the presence of PCE and TCE since they were first sampled in the late 1970s and early 1980s, and the concentrations have increased significantly since then. In 1987, an air-stripping treatment system was installed at the site to remove VOCs from the raw water being pumped from wells 10 and 11. Sample results of treated well water from May 1993, September 1995, and June/July 1999 have indicated that breakthrough of the treatment system has occurred on those occasions. The population served by each well is estimated to be 3,428 people. Therefore, a population of approximately 6,857 people are considered to be subject to actual contamination at concentrations above health benchmarks, i.e., Level 1. There are also approximately 80 other public supply wells within 4 miles of the site serving more than 300,000 people. Status May 2000): EPA is considering various alternatives for this site. The description of the site release) is based on information available at the time the site was evaluated with the HRS. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Eligibility: Eligible  
 Has Projects: Yes  
 NPL Status: Not on the NPL  
 Property History: Mitchel Field has been the site of troop encampments during every war in which the U.S. has engaged. In 1918, the site was reclassified as an active flying field and eventually became the home of observation, bombardment and pursuit groups. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

Project Required: Yes  
 Feature Description: Not reported  
 Latitude: 40.726101  
 Longitude: -73.5914

**FUDS Detail as of Jan 2015:**  
 Fiscal Year: 2013  
 Federal Facility ID: NY9799F1178

 NPL Status: Not Listed  
 Description: The former Mitchel Field consisted of about 1,437 acres in Hempstead, New York. Mitchel Field has a history of troop encampments since the Revolutionary War. In 1918, it became an active flying field. During World War II, it was used for training and for sending tactical units overseas. Abandoned tanks are present at the site, and hazardous and toxic wastes and ordnance could be present. The site is currently

History: occupied by Hofstra University, Nassau Community College, the Nassau Coliseum, and the Mitchel Sports Complex. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

Acquisition of the site occurred from 1917 until 1959. The installation consisted of 1,168.0 acres in fee, 181.67 acres in easement, and 7.08 acres and 79.07 acres that were licensed and leased, respectively. Mitchel Field was deactivated in April 1961; 1,076.77 acres fee were reported excess to the General Services Administration, and the remaining 92.13 acres fee were transferred to other DoD agencies. The principal owners of the site are now Hofstra University and Nassau Community College. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

Environmental Interest/Information System:  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

AIR MAJOR

ELECTRIC GENERATOR

HAZARDOUS AND CRITERIA AIR POLLUTANT MAJOR

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description: "The site is located in a commercialized area of Westbury. Prior to demolition activities, the site contained a main building and several buildings and structures located around the main building. All on-site structures were demolished in November 2000 and all excavated areas were backfilled with clean fill. The site was formerly used as a research facility. The past research and development activities resulted in the disposal of PCBs, metals and PAHs at the site. After NYU vacated the property in 1990, 200-300 containers were discovered

at various locations throughout the property. These drums contained residual waste, liquids, including demolition-related debris. The site owner consolidated and properly disposed the containerized wastes off-site. Waste from the operation of the site may have included PCBs from the transformers, capacitors, and machine oils used in compressors, mercury from lab instruments and cuttings and filings from fabrication of tools. An Interim Remedial Measure (IRM), consisting of a series of soil removal actions completed between 1997 and 2001, has effectively remediated contaminated soil at the site. Through the implementation of IRMs, 660 cubic yards of contaminated soils were removed from the areas of concerns and properly disposed of off-site. Over 1100 pounds of potentially hazardous materials were also removed and properly disposed of off-site, eliminating additional potential impacts. All on-site buildings and associated structures were demolished and demolition debris properly disposed of. The confirmatory soil sample concentrations were below the soil cleanup guidelines, with the exception of isolated detections of PCBs and mercury at inconsequential levels. The IRMs have significantly reduced the levels of on-site soil contamination and removed potential sources of future groundwater contamination. The site no longer poses a current or potential significant threat to public health and/or environment. A No Further Action Record of Decision (ROD) was issued by the Department in March 2002. The selected remedy included delisting the Site from the NYS Registry of Inactive Hazardous Waste Disposal Sites. The Site was deleted from the Registry effective October 18, 2002. The vapor intrusion exposure pathway was evaluated by the New York State Departments of Environmental Conservation and Health (NYSDEC and NYSDOH) at this Site in 2006. The NYSDEC and the NYSDOH have determined that no additional investigation or remedial measures are needed at this time to address the soil vapor intrusion pathway. "

Env Problem: "The site has been properly remediated and no further action is required. "

Health Problem: "All structures have been demolished and removed from the site. PCB and mercury contaminated soil has been effectively removed from the site. Any residual concentrations of contaminants that may exist at the site are either of inconsequential amounts or are sufficiently deep to prevent any significant threat to human health. Groundwater on-site is contaminated at levels slightly above groundwater standards but contaminants do not appear to have migrated off-site. Public water serves the immediate area."

Site Description: "This site was used by an industrial facility for chemical distribution. It is now a county-owned property on which a MTA / Long Island bus garage is located. Chlorinated solvents from the former chemical distribution facility have formed a contaminant plume in the groundwater within the area of the site. A groundwater treatment system utilizing air stripping was installed in 1989. Contamination removals exceed 130,000 pounds of contaminants. The Nassau County DPW has assumed full operation of this system in 2003. Operation of the remedial system must continue until the clean-up criteria of the 1985 Consent Judgment is achieved. The results of a soil sampling program in 1992 indicated that the soil clean-up objectives had been met and that further soil flushing was discontinued. In May 2000, additional work was agreed to that will further enhance groundwater extraction capability and ultimately decrease the time required to complete the

groundwater remediation. Additional work was done in 2002, including installation of deeper monitoring wells and upgrade of the pumping capacity. "

Env Problem: "The remediation included the installation of a slurry wall, air strippers, recovery wells, and the placement of recirculation piping in the source area. DR Apr2021: Approximately 25 VOCs and CVOCs were included in the Consent Order negotiated between DEC, AG, Nassau County, Purex, and the Town. Contamination levels ranged as high as 39,200ppb of Tetrachloroethylene (TCE). 2018: Albany PM agreed DEC/DOH would re-evaluate status after 3 years of GW monitoring of 2 wells immediately outside the S (downgradient) side of the source area. The sampling found under 10ppb of TCE, 1.1ppb Trichloroethylene, and ND for all other parameters. 2018: EC sampling performed. 2019: EE implemented for the source area. 2018-2020: Nassau County DPW performed GW sampling. 2021: NCDPW preparing to decommission the GW treatment building adjacent to the source area and its bus facility for bus parking. 2021: NC may also request full delisting. 2021: DEC requested additional GW sampling (source area, upgradient, VOCs, ECs) to further evaluate site status."

Health Problem: "Exposures to contaminated groundwater via drinking water are not expected because public water serves the area and there are no known users of well water in the vicinity. On-site soils are remediated, so dermal exposures are not expected. The potential for inhalation exposures to volatile organic compounds via soil vapor intrusion has not been evaluated. "

Updated By: DHRAYMON  
Site Description: "This site was used by an industrial facility for chemical distribution. It is now a county-owned property on which a MTA / Long Island bus garage is located. Chlorinated solvents from the former chemical distribution facility have formed a contaminant plume in the groundwater within the area of the site. A groundwater treatment system utilizing air stripping was installed in 1989. Contamination removals exceed 130,000 pounds of contaminants. The Nassau County DPW has assumed full operation of this system in 2003. Operation of the remedial system must continue until the clean-up criteria of the 1985 Consent Judgment is achieved. The results of a soil sampling program in 1992 indicated that the soil clean-up objectives had been met and that further soil flushing was discontinued. In May 2000, additional work was agreed to that will further enhance groundwater extraction capability and ultimately decrease the time required to complete the groundwater remediation. Additional work was done in 2002, including

installation of deeper monitoring wells and upgrade of the pumping capacity. "

Env Problem: "The remediation included the installation of a slurry wall, air strippers, recovery wells, and the placement of recirculation piping in the source area. DR Apr2021: Approximately 25 VOCs and CVOCs were included in the Consent Order negotiated between DEC, AG, Nassau County, Purex, and the Town. Contamination levels ranged as high as 39,200ppb of Tetrachloroethylene (TCE). 2018: Albany PM agreed DEC/DOH would re-evaluate status after 3 years of GW monitoring of 2 wells immediately outside the S (downgradient) side of the source area. The sampling found under 10ppb of TCE, 1.1ppb Trichloroethylene, and ND for all other parameters. 2018: EC sampling performed. 2019: EE implemented for the source area. 2018-2020: Nassau County DPW performed GW sampling. 2021: NCDPW preparing to decommission the GW treatment building adjacent to the source area and its bus facility for bus parking. 2021: NC may also request full delisting. 2021: DEC requested additional GW sampling (source area, upgradient, VOCs, ECs) to further evaluate site status."

Health Problem: "Exposures to contaminated groundwater via drinking water are not expected because public water serves the area and there are no known users of well water in the vicinity. On-site soils are remediated, so dermal exposures are not expected. The potential for inhalation exposures to volatile organic compounds via soil vapor intrusion has not been evaluated. "

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/26/2022	Source: EPA
Date Data Arrived at EDR: 08/02/2022	Telephone: N/A
Date Made Active in Reports: 08/22/2022	Last EDR Contact: 10/05/2022

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022	Source: EPA

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency

## **State and tribal institutional control / engineering control registries**

### ENV RES DECL: Environmental Restrictive Declarations

The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

Date of Government Version: 03/22/2022	Source: New York City Department of City Planning
Date Data Arrived at EDR: 06/17/2022	Telephone: 212-720-3300
Date Made Active in Reports: 09/02/2022	Last EDR Contact: 09/12/2022
Number of Days to Update: 77	Next Scheduled EDR Contact: 12/26/2022
	Data Release Frequency: Varies

### RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

## **Lists of state and tribal voluntary cleanup sites**

### VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

### ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000

	Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency

Number of Days to Update: 20	Next Scheduled EDR Contact: 12/12/2022
	Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/27/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/04/2022	Telephone: 202-564-8600

Number of Days to Update: 6	Next Scheduled EDR Contact: 01/30/2023
	Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

Data Release Frequency: Varies

## HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

## NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City's Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A	Source: EDR, Inc.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/08/2022  
Date Data Arrived at EDR: 05/09/2022  
Date Made Active in Reports: 07/28/2022  
Number of Days to Update: 80

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

UTM X (Meters):	619322.4
UTM Y (Meters):	4508695.0
Elevation:	78 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	14115948 FREEPORT, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
36059C0227G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
36059C0226F	FEMA Q3 Flood data
36059C0228F	FEMA Q3 Flood data
36059C0229G	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
FREEPORT	YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### ROCK STRATIGRAPHIC UNIT

Era: Cenozoic  
System: Quaternary  
Series: Pleistocene  
Code: Qp (decoded above as Era, System & Series)

### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam  
sandy loam  
sand

Surficial Soil Types: loam  
sandy loam  
sand

Shallow Soil Types: sandy loam

Deeper Soil Types: very gravelly - sand  
coarse sand

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Source: Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

October 19, 2022

New York State Department of Environmental Conservation  
Region 1 Office  
50 Circle Road  
Stony Brook, New York 11790

**Re: Freedom of Information Request  
101 James Doolittle Blvd. (and 2 parking lots south of the building)  
Section/Block/Lot: Section 44, Block F, Lots 326, 401, and 402  
Uniondale, New York 11553  
Langan Project No. 170754501**

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above property, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The Site is located at **101 James Doolittle Blvd.** in the **Uniondale, New York** (a hamlet within the Town of Hempstead) and is identified as **Nassau County Section 44, Block F, Lots 326, 401, and 402.** The Site is bound by Hempstead Turnpike to the south, 1225 Hempstead Turnpike to the west, Charles Lindbergh Blvd to the north, and James Doolittle Blvd to the east.

Please contact me at 212-479-5531 with any questions or send your response to my attention at [kgioia@langan.com](mailto:kgioia@langan.com) or at the below address:

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C.  
21 Penn Plaza  
360 West 31<sup>st</sup> Street, 8<sup>th</sup> floor  
New York, New York 10001-2727

Thank you in advance for your cooperation.

Sincerely,

**Langan Engineering, Environmental, Surveying  
Landscape Architecture, and Geology, D.P.C.**

FOIL #: 22-10-294  
RE: Langan Project No. 170754501

Dear Kaitlyn Gioia:

This will acknowledge receipt of your request for records under the Freedom of Information Law (FOIL), received by this office on October 19, 2022.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 business days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

Rosemarie Hewig, Esq.  
Records Access Officer

RH/sjp

DEPUTY COMMISSIONER

October 26, 2022

Re: FOIL #2022106638

In response to your FOIL request, we have completed our Violation Search of the referenced FOIL. Enclosed please find the redacted complaints / violation / report for the subject location. As of this date, there are no assessments.

FOR FURTHER PERMIT INFORMATION:

A PERMIT SEARCH for records and file information, application and C/O listing and status for the subject location's permits are available from our office at the PERMIT/CERTIFICATE counter for a fee of \$25.00 per location.

All permit files copies/plans are available thereafter at our kiosk or [Hempsteadny.viewpointcloud.com](http://Hempsteadny.viewpointcloud.com) by entering permit numbers from search sheet.

OR

Visit; [Hempsteadny.viewpointcloud.com/CERTIFICATE SEARCH](http://Hempsteadny.viewpointcloud.com/CERTIFICATE_SEARCH) for online permit search. Permit numbers may then be entered to view / download files thereafter in same portal.

This FOIL is now completed. I hope this information is helpful to you.

PLEASE BE ADVISED WE DO NOT MAINTAIN ENVIRONMENTAL/ HEALTH RECORDS

Very truly yours,

Department of Buildings  
FOIL Division

EAST HEMPSTEAD NO. 24

REDRAWN DECEMBER 1978

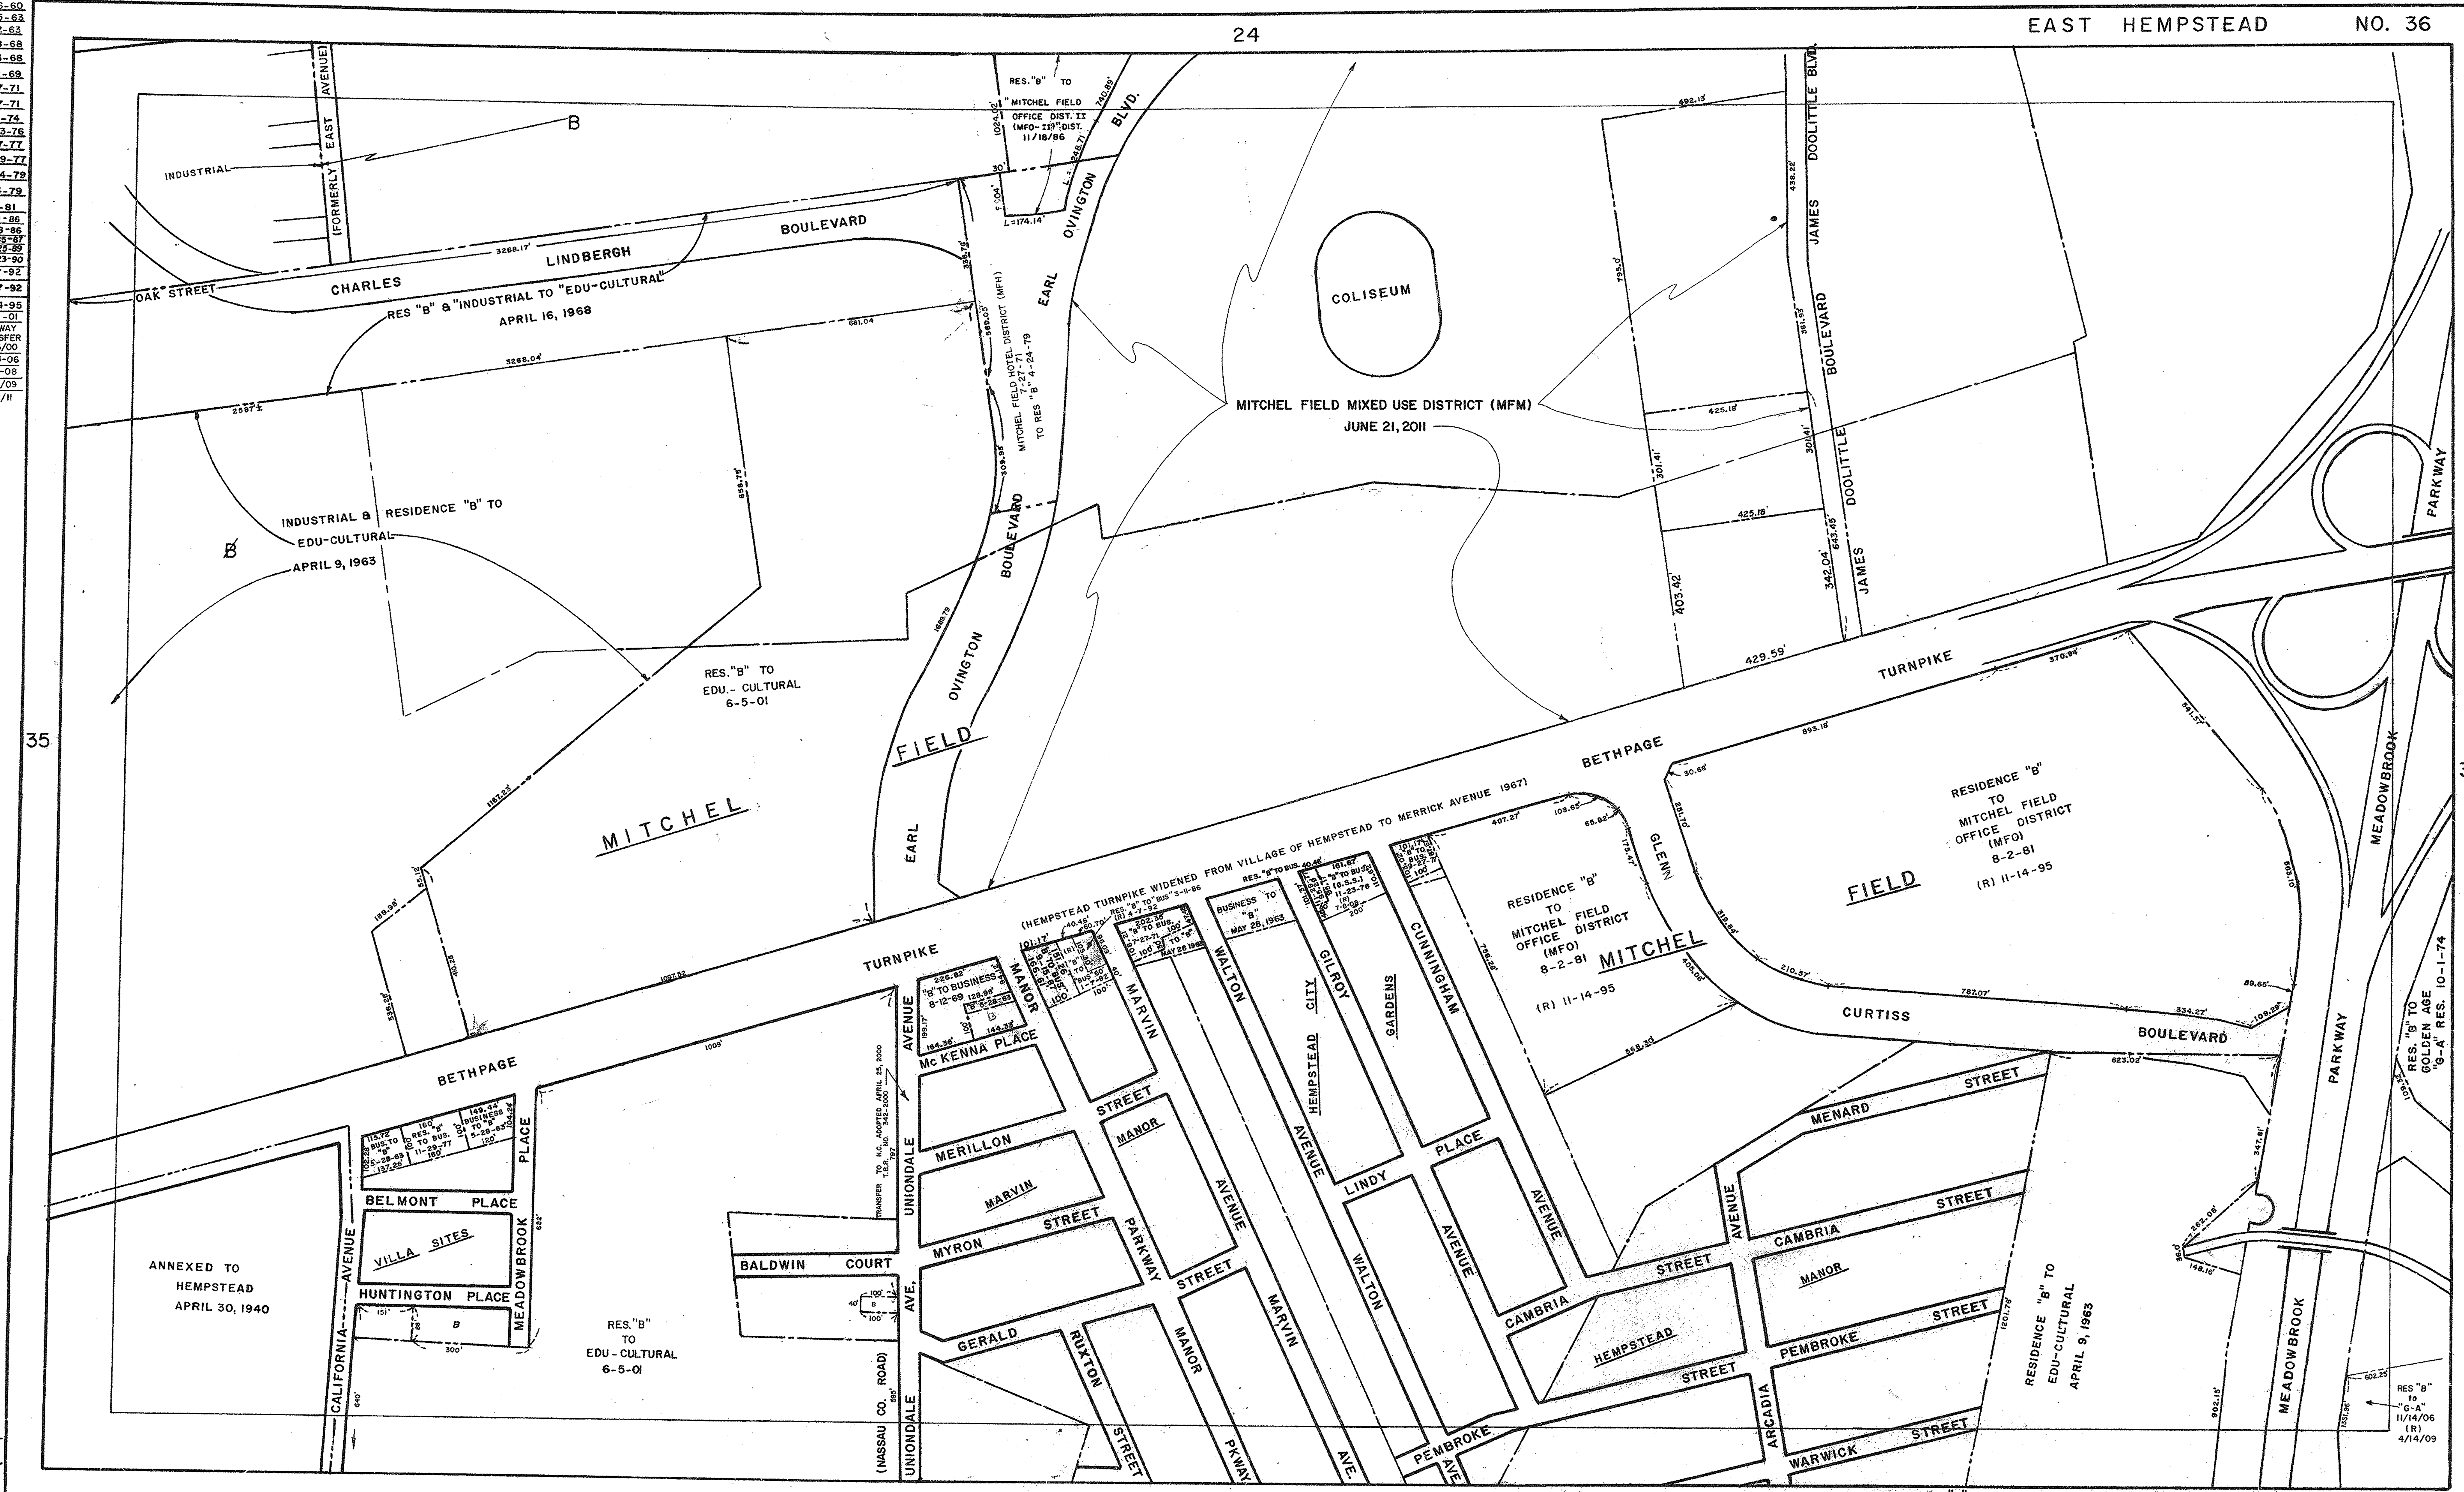

THE NOTATION (R) HAS BEEN ADDED TO THE ZONING SHEETS AS OF 10/15/88, TO DENOTE THAT DECLARATION, RESTRICTIONS OR COVENANTS HAVE BEEN MADE PART OF THE ZONING. REZONINGS PRIOR TO THAT DATE ARE NOT SO DESIGNATED AND MAY OR MAY NOT HAVE CONDITIONS OR RESTRICTIONS IMPOSED ON THEIR USE. THE ACTUAL REZONING DOCUMENTS SHOULD BE EXAMINED AT THE TOWN CLERK'S OFFICE TO DETERMINE IF ANY C & R'S ENCUMBER THE USE OF APPLICABLE PROPERTY.

THE OFFICIAL TOWN OF HEMPSTEAD ZONING MAP WAS ESTABLISHED AND ADOPTED IN 1929 BY THE TOWN OF HEMPSTEAD ZONING COMMISSION AND PLANNING BOARD. THIS SHEET MAY NOT ACCURATELY REFLECT HIGHWAY ACQUISITION AND PROPERTY ALIGNMENT AND MAY BE SUBJECT TO ANY STATEMENT OF FACT AN ACCURATE SURVEY MIGHT REVEAL.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

# EDR Environmental Lien and AUL Search

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

QUITCLAIM DEED

THIS INDENTURE, made as of January 15, 2015, between TOWN OF HEMPSTEAD INDUSTRIAL DEVELOPMENT AGENCY, a public benefit corporation of the State of New York, having its office at 350 Front Street, 2<sup>nd</sup> Floor, Hempstead, New York 11550, grantor, and NASSAU COUNTY INDUSTRIAL DEVELOPMENT AGENCY, a public benefit corporation of the State of New York having its office at Theodore Roosevelt Executive & Legislative Building, 1550 Franklin Ave., Suite 235, Mineola, New York 11501, grantee

WITNESSETH that the grantor, in consideration of One Dollar (\$1.00) lawful money of the United States and other good and valuable consideration, paid by the grantee, does hereby remise, release and quitclaim unto the grantee, the heirs or successors and assigns of the grantee forever,

All the buildings and improvements erected, situate, lying and being on that certain plot, piece or parcel bounded and described on Exhibit A attached hereto

Property Address: 101 James Doolittle Boulevard, Uniondale, Town of Hempstead, Nassau County, New York

Tax Billing Address: 591 Putnam Avenue, Greenwich, CT 06830, Attn: Marcos Alvarado

Section, Block & Lot: Section 44 Block F Lot 326 ✓

TOGETHER with the appurtenances and all the estate and rights of the grantor in and to said premises,

TO HAVE AND TO HOLD the premises herein granted unto the grantee, the heirs or successors and assigns of the grantee forever.

The conveyance of the premises pursuant to this Quit Claim Deed is subject to the lien of the instruments and agreements listed on said Exhibit B. This deed is subject to the trust provisions of Section 13 of the Lien Law.

The words "grantor" and "grantee" shall be construed to read in the plural whenever the sense of this deed so requires.

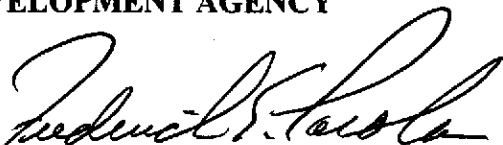

Being and intended to be the same premises conveyed to the grantor in a deed dated 12/28/05 and recorded 12/29/05 in Liber 12058 page 265 (affects Hotel Parcel – Lot 326 and Easement Parcels Only)

Record and Return to:  
William F. Weir, Esq.  
Nixon Peabody LLP  
1300 Clinton Square  
Rochester, New York 14604

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

# KIMBERLY SEMON, PE, LEED GA

## SENIOR PROJECT MANAGER

## ENVIRONMENTAL ENGINEERING

---

Ms. Semon is a chemical engineer whose expertise includes groundwater hydrology, water resource planning and management, environmental oversight and remediation and emerging contaminants in groundwater. She has performed environmental field work, site research, data management and report preparation and is currently involved with remedial design and implementation and project management. Ms. Semon is also well versed in city and state regulatory programs including the Brownfield Cleanup Program and Voluntary cleanup Program.

### SELECTED PROJECTS

---

- Novak Farm, (Emerging Contaminant Sampling Work Plan) McDonough, NY
- 27-01 Jackson Avenue, (Phase I ESA, BCP Application, RIWP), Long Island City, NY
- 26-32 Jackson Avenue, (Phase I ESA, Phase II ESI, BCP Application), Long Island City, NY
- 266-270 West 96<sup>th</sup> Street, (Phase I ESA, Phase II ESI, BCP Application), New York, NY
- 1525 Bedford Avenue, (Noise IR, Quarterly Monitoring Report), Brooklyn, NY
- 805-825 Atlantic Avenue, (Phase I ESAs, Subsurface Investigations, BCP Application, RI, RIR, RAWP), Brooklyn, NY
- 181 Mercer Street, (RIR, RAWP, Environmental Remediation, Spill Closure), New York, NY
- Tottenham Hale, (Phase II ESI), London, UK
- Nine Elms Square Development (Phase II Reporting), London, UK
- Queens Plaza North, (NYS BCP, Environmental Remediation), Long Island City, NY
- 335 Bond Street, (BCP Application, Subsurface Investigations, Groundwater Remediation Design), Brooklyn, NY
- 540 West 21<sup>st</sup> Street, (NYC Voluntary Cleanup Program, RIR, RAWP), New York, NY
- 982-998 Fulton Street, (Phase I ESA), Brooklyn, NY
- 121 Christopher Street, (Phase I ESA), New York, NY
- 2415-2419 Jerome Avenue (Phase I ESA, Phase II ESI, Spill Closure), Bronx, NY
- 267 West 87<sup>th</sup> Street, (Remedial Investigation & Report), New York, NY
- 211-215 East 38<sup>th</sup> Street, (Phase I ESA, Phase II ESI), New York, NY
- 615 Tenth Avenue, (Reporting), New York, NY
- River Place I & II, (Groundwater Monitoring), New York, NY
- Riverside Parcel 5, (Construction Oversight, Endpoint Sampling, Closure Report), New York, NY
- Riverside Parcel 2, (Construction Oversight), New York, NY
- 170 Amsterdam Avenue, (Construction Oversight), New York, NY
- 17-29 West End Avenue, (Construction Oversight), New York, NY

### EDUCATION

M.S., Sustainable Engineering – Environmental Sustainability  
Villanova University

B.S., Chemical Engineering  
Villanova University

### PROFESSIONAL REGISTRATION

Professional Engineer (PE) in NY

10-Hour OSHA

40-Hour OSHA (HAZWOPER)

LEED Green Associate

### AFFILIATIONS

Society of Women Engineers

American Institute of Chemical Engineers

National Groundwater Association

## KIMBERLY SEMON, PE, LEED GA

---

- 539 Smith Street Bulkhead, , (Construction Oversight), Brooklyn, NY
- Brooklyn Academy of Music North Tower, (Construction Oversight, FER), New York, NY
- Brooklyn Solvent Site (Whitehead Realty), (Construction Oversight), Brooklyn, NY
- Hudson Yards, Terra Firma, (Construction Oversight), New York, NY
- 616 First Avenue, (Construction Oversight), New York, NY
- 27 Wooster Street, (Closure Report), New York, NY
- Columbia University Manhattanville Development, Phase IA & Topdown Area, (Closure Report), New York, NY

# KAITLYN GIOIA

SENIOR STAFF SCIENTIST

ENVIRONMENTAL ENGINEERING

---

Ms. Gioia is an Environmental Scientist with the New York City team. Ms. Gioia graduated in 2016 from Adelphi University with a B.A. in Environmental Studies. Ms. Gioia's experiences include project management, leading field work, exposure to an assortment of environmental pollutants, remedial action procedures, & Phase I and Phase II Environmental Assessments. Ms. Gioia has performed Asbestos Hazard and Emergency Response Act (AHERA) inspections and evaluations in schools and State Pollutant Discharge Elimination System (SPDES) sampling for power plants and commercial facilities.

## SELECTED PROJECTS

---

- 80-100 Flatbush Avenue, Brooklyn, NY
- 250 Water Street, New York, NY
- 35-01 & 35-09 Northern Boulevard, Long Island City, NY
- 23-15 44<sup>th</sup> Road, Long Island City, NY
- South Randalls Due Diligence, New York, NY
- 595-647 Smith Street, Brooklyn, NY
- Willets Point Redevelopment, Flushing, NY
- President Street Properties, Brooklyn, NY
- 475 Bay Street, Staten Island, NY
- Confidential Project, Queens, NY
- 137 Kings Highway, Brooklyn, NY
- 111 Willow Avenue, Bronx, NY
- 560 Degraw Street, Brooklyn, NY
- 122 Fifth Avenue, New York, NY
- Insurance Claim Oversight, White Plains, NY\*
- Subrogation Potential Investigation, Lindenhurst, NY\*
- Brookhaven National Lab, Brookhaven, NY\*
- Far Rockaway Vault Sampling, Far Rockaway, NY\*
- East Islip School District AHERA Inspection, East Islip, NY\*
- UPRS SPDES Sampling, Uniondale, NY\*
- 550 Stewart Avenue Phase I and II, Garden City, NY\*
- Riverhead to Canal Cable Expansion, Riverhead, NY\*
- Noise Dosimetry Study, Queens, NY\*
- School District Lead in Water Sampling, Yonkers, Kings Park, and Baldwin, NY\*
- Potable Water Sampling, New York, NY\*
- DCF Remediation Oversight, Malverne, West Hempstead, and Port Washington, NY\*
- AOP Pilot Testing, Garden City Park, Franklin Square, and Port Washington, NY\*
